
David Goodstein

Member Services Coordinator, Outsourcing Institute & Institute for Robotic Process Automation & Artificial Intelligence

David Goodstein · 3:38 AM

Thank you for connecting! I saw that your company has some content around Artificial Intelligence. Looks very interesting! We are actually putting together a webinar series here for our members focused on these topics. We thought you may be a good fit to sponsor this series and brief our members on your story, customer case studies and generate exposure and opportunities from our network . We are a professional association & industry media organization with 100,000 members globally focused on providing education, networking opportunities, guidance and proactive resources in the Robotic Process Automation, AI, & Digital Enterprise Transformation industries. Is this worth a conversation?

Regards,
David

Mr. Danish Khan

Founder

EasyTech4All

Cordial Invitation for 19th INBUSH ERA World Summit 2019

Dear Mr. Danish Khan,

Most Respectful Greetings from Amity, India!

We are extremely heartened to know of the positive progress of our growing association with EasyTech4All & look forward to making a historical beginning with you at our campus in US from 2019.

We would be honoured to have your presence during our upcoming **International Business & Research Conference, INBUSH-ERA World Summit** which is being organized for the 19th time from 20th – 22nd February 2019 at Amity University Campus, Sector – 125, Noida on the theme, "**Honouring the Past, Treasuring the Present, Shaping the Future – Global Leaders of today & tomorrow".**

We are confident that you will find this platform to be most enriching as over 500 Thought Leaders, Research Gurus, Scientists, Cabinet Ministers, Ambassadors & High Commissioners, Members of Parliament, Vice Chancellors, Deans and Directors from reputed National & International Universities, Noted Academicians, High profile media personalities, Corporate leaders and students from almost 115 countries will be participating in this magnanimous Summit to address few of the most burning issues of the day.

While we would also welcome your participation in the other sessions of the Conference, we appreciate your various commitments & will go completely as per your convenience for the same.

We would further be grateful if your office could circulate the details of this Conference (www.amity.edu/inbushera) within the EasyTech4All community about this occasion.

Your kind acceptance of our invitation and gracious presence on the occasion will indeed be a source of great motivation for our budding young professionals & participating delegates of this conclave, who will be further delighted to listen to your special address & imbibe many valuable leadership lessons from your unparalleled experience.

Your Presence needed in this Session : "International Conference on Recent Trends in Engineering Technology and Business Management"

DAY 02 (21/02/2019) of INBUSH ERA 2019.

Timings: 9am to 5:30pm

Venue: F3 Block MDP Room.

Note: Our two Students Ranjali and Shivangi will be your support team at Amity.

We look forward to your early positive response & confirmation on the above and to welcome you personally during the conference.

Prof. (Dr.) Nitin Arora

3/22 W&M National Security Conference Attendee Information

1 message

W&M Whole of Government <wgc@wm.edu>
To: W&M Whole of Government <wgc@wm.edu>
Cc: Floyd, Kay <khfloyd@wm.edu>, Lydia Urban <lydiaurban@icloud.com>

Mon, 18 Mar, 2024 at 5:30 pm

WILLIAM & MARY
WHOLE OF GOVERNMENT CENTER OF EXCELLENCE
MARCH 22 | 8AM-5PM
WILLIAMSBURG, VA
DATA & DEMOCRACY
AI, CYBER DEFENSE, & NATIONAL SECURITY

We are excited to welcome you to campus this Friday, March 22, 2024 for our 4th Annual National Security Conference!

Opening remarks will begin promptly at 8:30 a.m. EST. and closing remarks will finish at 5:00 p.m. EST.

Location:
The conference will be held in Brinkley Commons, on the 2nd floor of the Raymond A. Mason School of Business. The address is 101 Ukrop Way, Williamsburg, VA 23186.

Parking:
All W&M students, staff, and faculty **must** park in their respective spaces, following W&M parking guidelines. Guests un-affiliated with William & Mary must print a parking pass (attached) and park in the Kaplan lot, 239 Brooks St, Williamsburg, VA 23185. There will be a complimentary shuttle running from the Kaplan lot to the Business School. Please use the shuttle to get to and from the conference.

Registration:
If you have received this email, you are registered! Please stop by the registration table on the way into the conference for your nametag. Due to overwhelming support, we have a running waitlist. If you are now unable to attend in person, please let us know at wgc@wm.edu so a hopeful attendee can be moved off the waitlist. Join our live stream here to keep up with the conference!

Food/Beverage:
There will be a complimentary beverage station, along with a light breakfast, and a buffet lunch for all attendees. All items will be labeled as gluten-free, dairy-free, and nut-free, to accommodate all dietary needs.

Questions/concerns? Please contact Lydia Urban, luurban@wm.edu, for any questions or concerns leading up to the conference.

Hi Danish,

Congratulations! Your registration to the 2021 virtual Cyber Security Summit (Oct 25-27) is now complete. Please save this email for future reference and note your specific registration details below. If your registration included a payment, you will shortly receive a receipt from PayPal at the email address you provided. Please be advised that on behalf of the Cyber Security Summit, your credit card statement will reflect payment to ***Paypal *EVENTGROUP*.**

PLEASE NOTE: On Sept 28, you will be notified via email with instructions for unlocking your virtual access. You will be required to access our virtual platform to select the sessions that you plan on attending to ensure admittance on-site and online. While on the platform, take advantage of early access to the virtual EXPO Hall to engage with our solutions strategy partners.

We encourage you to also get familiar with the agenda, the speakers and the sponsors to make the best of your participation: https://cybersecuritysummit.org

Cyber Security Digital Summit APAC
July 30, 2019
2:00 pm - 2:45 pm SGT
Human Factors:
Anticipating The Risk Of Human Error
For Robust Cyber Security

Overview

Title: Human Factors: Anticipating The Risk Of Human Error For Robust Cyber Security

Date: Tuesday, July 30, 2019

Time: 02:00 PM Singapore Time

Duration: 1 hour

If you have previously registered for this event, please login below:

Email* Easytech4all.in@gmail.com

LOGIN

Not Registered?

Summary

Human Factors: Anticipating The Risk Of Human Error For Robust Cyber Security

- Measuring the risk of malicious intent as the primary motivation behind a data breach
- Mitigation strategies available to you and your workers to avoid data breaches and security compromised by human error
- How to identify which systems require protection, which adversaries are most likely to target your systems and what level of protection is required

Speakers

Bart Kulach
CISO/Chief Architect
CS Hub

Bart is a hands-on security leader with 15+ years of international IT and security-related work history and strong technical and process related expertise; this all including 10+ years of experience in the financial industry in various IT audit, IT risk and IT security functions, as subject matter expert, advisor, coach and manager. He is flexible, open for new challenges and experiences, with passion for IT security, IT governance, process optimisation and operational excellence as - in his belief - the greatest business enabler. Professional interests include - among others - new trends in technology as well as the latest security and risk developments.

Thank you for participating in the virtual 11th Annual Cyber Security Summit!

Hi Danish,

Thank you for participating in the 11th Annual Cyber Security Summit! This year we saw over 1,000 registrants from 43 states and 21 countries! The sessions you registered for will be available for viewing until November 24. Take advantage of the virtual platform and continue exploring the booths, sessions and resources provided.

Please help us in our planning for next year and **complete the Attendee Post-Event Survey.** It is a short survey comprised of 10 questions. Once logged in to the virtual platform, you can access the survey by clicking on Survey in the upper right blue navigation bar. Select Attendee Post-Event Survey. If you have already completed this, thank you!

Insider Threat & Economic Espionage Trends in Asia Pacific Confirmation

1 message

Alyssa Downing <customercare@gotowebinar.com>
Reply to: adowning@flashpoint-intel.com
To: danishkhanlko@gmail.com

Thu, 28 Mar, 2019 at 10:46 PM

FLASHPOINT

Dear Danish,

Thank you for registering for "Insider Threat & Economic Espionage Trends in Asia Pacific".

Presenter: Eric Lackey, Principal Advisor

Diverse geopolitical and economic interests of the states within Asia Pacific (APAC) play a significant role in shaping cyber threat activity against entities operating in the region. Ubiquitous cybercrime and financial fraud schemes comprise much of this activity, but state-sponsored espionage remains a top concern for enterprises and government organizations alike. Flashpoint has recently observed that certain nation-state actors in APAC appear to be increasingly interested in conducting economic espionage using one particular vector: insider threat.

During this webinar, Eric Lackey, Principal Advisor at Flashpoint, will examine the intersection between economic espionage and insider threat, discuss recent cases that have impacted entities in APAC, and provide insight into the following aspects of this growing trend:

- How and why actors determine certain targets
- Insider recruitment techniques
- Tactics and tradecraft
- Implications for defenders

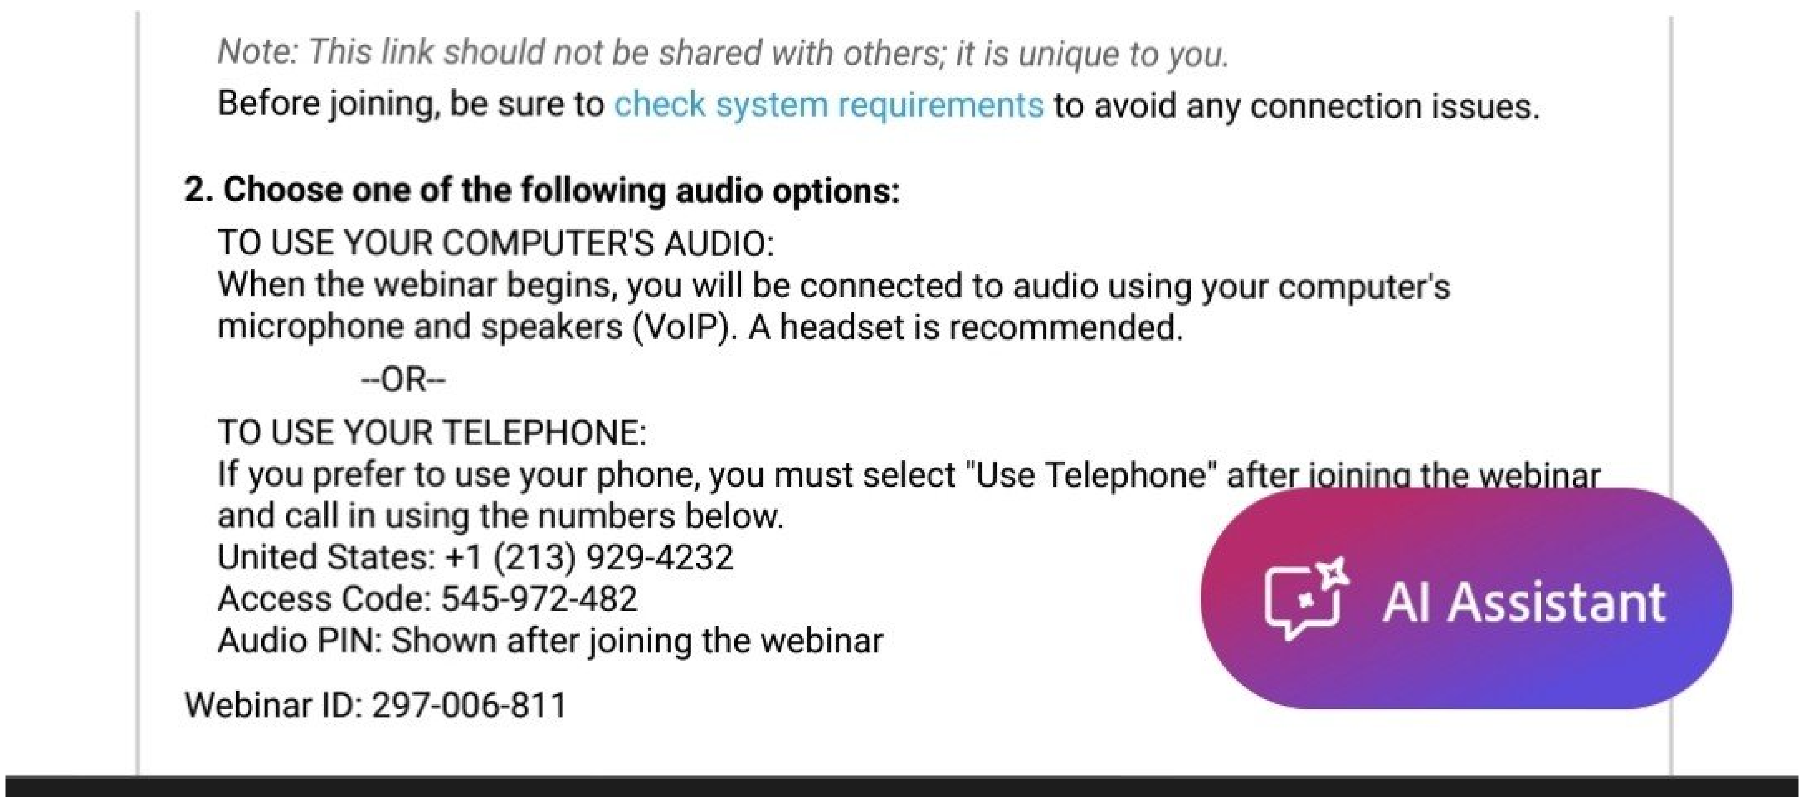
Please send your questions, comments and feedback to: adowning@flashpoint-intel.com

How To Join The Webinar

Thu, Apr 18, 2019 12:00 PM - 1:00 PM AEST

Add to Calendar: Outlook® Calendar | Google Calendar™ | iCal®

1. Click the link to join the webinar at the specified time and date:



Note: This link should not be shared with others; it is unique to you.

Before joining, be sure to check system requirements to avoid any connection issues.

2. Choose one of the following audio options:

TO USE YOUR COMPUTER'S AUDIO:
When the webinar begins, you will be connected to audio using your computer's microphone and speakers (VoIP). A headset is recommended.

--OR--

TO USE YOUR TELEPHONE:
If you prefer to use your phone, you must select "Use Telephone" after joining the webinar and call in using the numbers below.
United States: +1 (213) 929-4232
Access Code: 545-972-482
Audio PIN: Shown after joining the webinar

Webinar ID: 297-006-811

Thank you for joining us on Day One of CISA's 4th Annual Cybersecurity Summit!

Thank you for joining us today for the first day of our 4th Annual National Cybersecurity Summit! We hope you enjoyed hearing from these remarkable cyber leaders. For your convenience, today's recording and slides are available on the Day One webpage.

The Cyber Summit will continue over the next three Wednesdays: October 13, October 20, and October 27. Join us next week to learn more about The Collective Defense and the value of partnerships within .gov and other entities. The agenda for next week's session is now available.

A link will be sent via Eventbrite notifications to join Day 2 of the Cyber Summit the morning of the event at 9am ET. If you register after 9am ET, please visit https://www.cisa.gov/live.

As always, please contact us at CyberSummit@hq.DHS.gov if you have any questions. See you next week!

If you encounter any technical issues, please contact your IT administrator. You can also visit our FAQs page for more information.

Partnering with Industry:
The NSA Cyber Collaboration Center
Thursday, December 9 | 4:00 - 6:30 pm ET

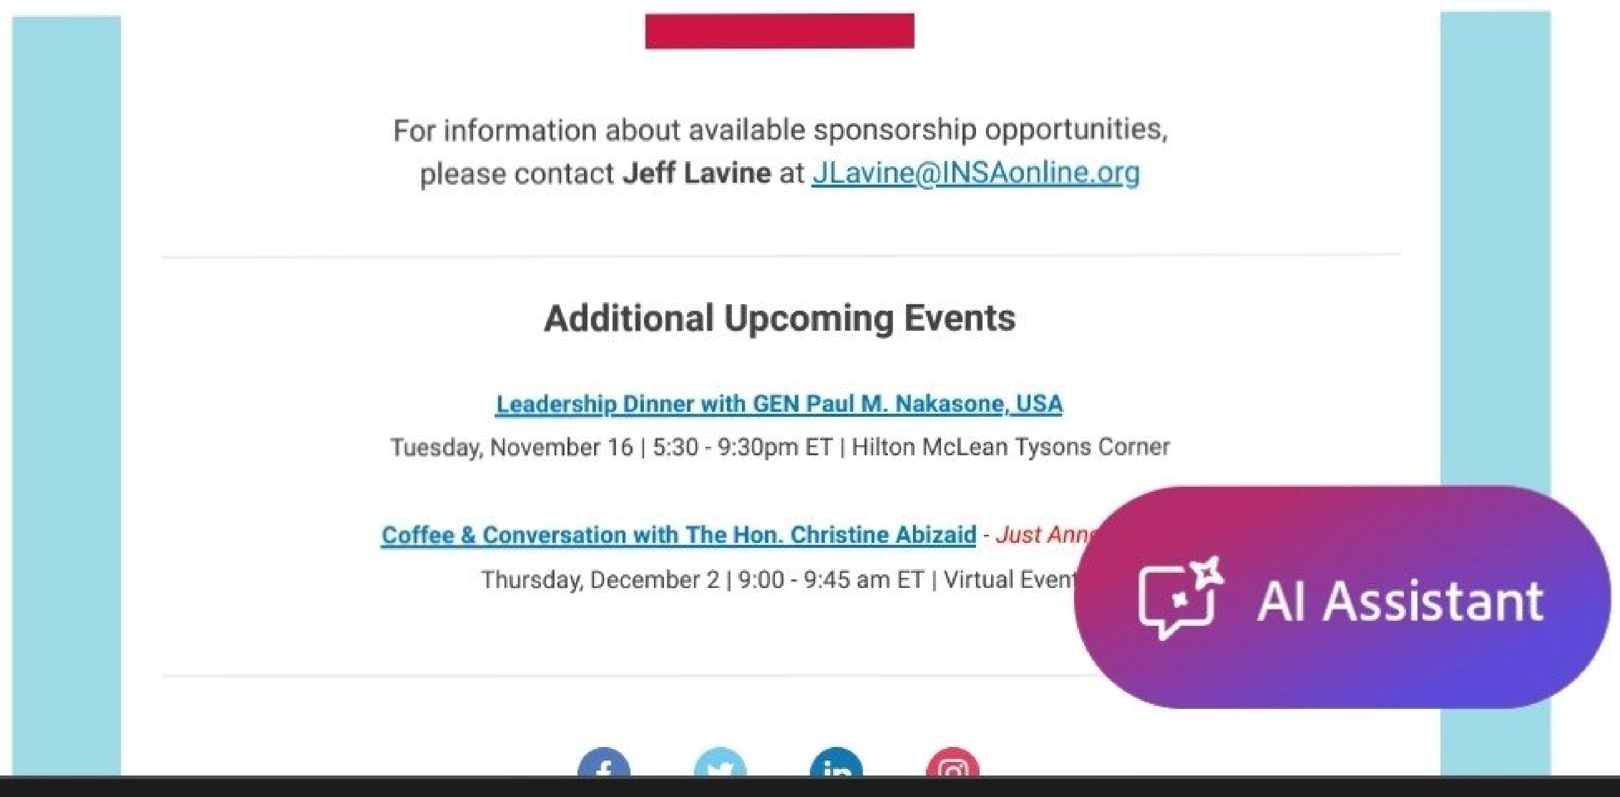
You Asked. We Answered. Join us in Ft. Meade!

Join IC and national security colleagues at the BWI Marriott on **Thursday, December 9,** from **4:00-6:30 pm** for networking and a panel discussion on information sharing with the NSA Cyber Collaboration Center.

Held in partnership with the Ft. Meade Alliance, panelists will discuss ways industry can engage the Center; lessons learned from recent cybersecurity incidents; implementation of the President's EO on Cybersecurity; and more.

Meet the Panelists:

- **Morgan Adamski**, Director, Cyber Collaboration Center, NSA
- **Maj. Gen. James Keffer, USAF (Ret)**, Director, Warfighting Concepts & Cyber Futures Concepts, Lockheed Martin Government Affairs
- **Joseph Pacileo,** Sr. Vice President, IronNet Inc., and Vice President, Ft. Meade Alliance
- **John Doyon (moderator)**, Executive Vice President, INSA



For information about available sponsorship opportunities,
please contact **Jeff Lavine** at JLavine@INSAonline.org

WEBCAST OVERVIEW

As the United States defense and intelligence communities continue to collect more and more data from a growing pool of sources, they need tools to help them evaluate and manage it to make it useful instead of overwhelming. Tools such as artificial intelligence can help organize and manage data, while searching for patterns or key search terms faster than humans can, while cloud services can help distribute information widely while keeping it secure. But human analysts are still needed to evaluate and make sense of what has been collected in a timely manner. That means building tools that can augment and support human skillsets, not replace them. In this webcast, C4ISRNET will explore the tools available to help manage and evaluate data, the skillsets needed to get the most from those tools and what the future of AI-supported data collection looks like.

Attendees will be able to submit questions in real time.

MAY
25
U.S. CHAMBER OF COMMERCE
NOW
+
NEXT
CYBER CONFERENCE
SOUTH CAROLINA CHAMBER OF COMMERCE
CYBER SC

Thank you to everyone who joined us for **NOW + NEXT: Cyber Conference.** [Click here to replay the webinar.]

In the first portion of this conference, South Carolina's Governor, **The Honorable Henry McMaster,** and the CEO of the South Carolina Chamber of Commerce, **Bob Morgan**, kicked off the event. **General Keith Alexander**, Founder and co-CEO, IronNet, former Commander, U.S. Cyber Command, and former Director, National Security Agency, and **Lt. General Bruce Crawford**, U.S. Army (Ret.), Senior Vice President, Strategic Development, Critical Mission Solutions, Jacobs and former Chief Information Officer, U.S. Army, engaged in a meaningful discussion about the need for public and private organizations to form a collective defense in cyberspace to share information, hunt, identify and stop threats together. The following panel discussed cybercrime-as-a-service and ransomware, which was moderated by **Shannon Vavra**, a reporter at CyberScoop, and included a group of expert government and industry speakers, including **Nitin Natarajan**, Deputy Director, Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security, **Raj Samani**, Fellow, Chief Scientist, McAfee, **Megan Stifel**, Executive Director, Americas, Global Cyber Alliance, and **Harry W.**, Technical Director for Incident Management, National Cyber Security Centre. **Chris Herron**, Territory Manager – South Carolina, Check Point Software Technologies introduced our final panel, which focused on the cyber ecosystem in the Central Savannah River area and included **Kim Christ**, Director, Technology and Cybersecurity Initiatives, South Carolina Council on Competitiveness, **Scott Cooper**, Chairman, Edgefield County Council, **Dr. Sandra J. Jordan**, Chancellor, University of South Carolina Aiken, **Will Williams**, President and CEO, Aiken Economic Development Partnership, and **Tom Scott**, Executive Director, CyberSC

The program featured keynote remarks from **Kiersten Todt**, Managing Director, Cyber Readiness Institute, who was in conversation with **Karen Painter Randall**, Attorney, Cyber Law Task Force, University of South Carolina, to discuss small business cybersecurity, as well as **The Honorable Tom Young Jr.**, State Senator of South Carolina, who provided remarks on proposed cyber economic legislation.

Registration is opening soon for the Chamber's NOW + NEXT: Cyber Essentials Webinar

- We look forward to welcoming you to our upcoming event on Tuesday, June 29th. The Chamber will send event details and the registration link in the coming weeks.

to me

Hi Danish,

The white house has recently released an executive order (EO) on improving the nation's cybersecurity. The EO describes the various agencies and infrastructures deemed critical for the nation.-The interesting part is that "Critical Infrastructure" does not refer only to power plants, water facilities, and military systems, it also refers to many digital systems on which nations rely on.

U.S. CHAMBER OF COMMERCE

Danish,

Businesses need a cybersecurity strategy to protect both organizational infrastructure and customer data from growing cybersecurity threats, and business leaders play a critical role in ensuring that their businesses remain secure. This program is intended to provide business leaders with insights into how leveraging the Cybersecurity and Infrastructure Security Agency's (CISA) pillars of Cyber Essentials will provide a starting point to greater resilience through building an organizational culture of cyber readiness. The program will bring together key leaders from CISA to discuss the pillars and engage directly with the private sector.

Register today for the U.S. Chamber of Commerce's **NOW + NEXT: Cyber Essentials Webinar**, which will be held virtually on **Tuesday, June 29, 2021**, at **11:00 a.m. (Eastern Daylight Time)**.

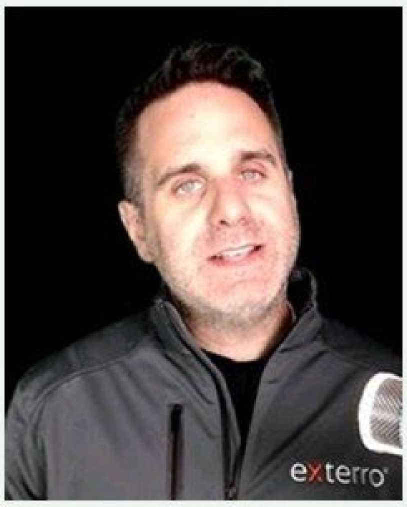
THE ROLE OF FORENSICS IN CYBERSECURITY

JUNE 13TH | 2:00 PM EST

REGISTER TO WATCH

GUEST SPEAKERS:

Mike Prado
Deputy Assistant Director for
Homeland Security Investigations,
DHS Cyber Crimes Center (C3)



Justin Tolman
Forensic Subject Matter Expert,
Exterro

Responding to cybersecurity incidents requires detailed investigation to identify vulnerabilities, trace attack vectors and safeguard against future intrusions.

The Cybersecurity and Infrastructure Incident Response and Vulnerability playbook released by the Cybersecurity and Infrastructure Security Agency (CISA) in November 2021 lays out a detailed plan for how agencies should implement communication, technology, and policy for Incident response. Forensic collection, preservation, analysis, and reporting are important parts of this playbook.

In this webcast, Federal Times will explore the Incident Response playbook, the role of forensic investigation and key collection technologies and methods for effective incident response.

Exploring the Asia Pacific Cybercrime Landscape Webinar Confirmation
1 message

GoToWebinar Registration <customercare@gotowebinar.com> Sat, 10 Nov, 2018 at 12:55 AM
Reply to: vsatrom@flashpoint-intel.com
To: Danishkhanlko@gmail.com

Dear Danish,

Thank you for registering for "Exploring the Asia Pacific Cybercrime Landscape Webinar".

7:30 a.m. Mumbai | 10:00 a.m. Singapore | 11:00 a.m. Tokyo | 1:00 p.m. Melbourne/Sydney

Home to nearly half of the world's internet users across dozens of economically, culturally, and linguistically distinct nations, the Asia Pacific (APAC) region has become a hotbed for cybercrime. The proliferation of various fraudulent schemes, along with several high-profile cases of compromised government and corporate databases, have put companies and large portions of the populace in APAC at risk for being the target of cybercriminal activity. This webinar will unpack the region's cybercrime landscape, share real-world examples of how cybercriminals are targeting organizations and individuals in APAC, and discuss what defenders can do to mitigate the associated risks.

Please send your questions, comments and feedback to: vsatrom@flashpoint-intel.com

FBI Executive Assistant Director Darrin Jones confirmed as closing keynote, Oct 26

In an exciting new development for this year's virtual **11th Annual Cyber Security Summit**, FBI Executive Assistant Director **Darrin E. Jones** will close our Day 2 programming with his presentation, "The Lawful Access Challenge."

EAD Jones, who leads the FBI's scientific, operational technology, and criminal justice information sharing programs, will discuss the escalating risk posed by the lawful access to encrypted data challenge, which impedes the investigation and prevention of serious crimes such as online child exploitation and sexual abuse. His remarks underscore the shared interests between law enforcement and industry to ensure aggressive support and recommended use of strong, but responsibly managed encryption.

EAD Jones will also highlight the importance of continued cooperation and partnership in the international law enforcement community that is vital to address public safety and the national security challenges presented by modern communication services, applications, and devices.

It's yet another example of the high caliber thought leaders the Cyber Security Summit draws. We invite you to explore our **robust agenda** and our full state of presenters.

Join us **Oct 25-27** as we seek solutions together.

New IC Session Spotlight!

'Female Trailblazers in Intelligence & National Security'
Monday, July 12 | 2:00-3:00 PM ET

The week-long New IC: Empowering Women and Engaging Men Virtual Symposium, July 12-16, kicks-off with a powerful panel of female trailblazers. These IC and national security leaders will share their experiences breaking down barriers and offer advice to those following in their footsteps.

- **Gina Abercrombie-Winstanley,** Founder, The Leadership Council for Women in National Security; First Chief Diversity and Inclusion Officer, State Dept.
- **The Hon. Ellen McCarthy,** Former Asst. Secretary of State, Bureau of Intelligence & Research; First female President of INSA
- **Jennifer Smith,** First female PhD hired by FBI
- **Tracy Walder,** Former CIA Officer & FBI Special Agent; Author, *The Unexpected Spy;* First female operative to move from CIA to FBI
- **Matice Wright-Springer,** Sr VP, Global Defense Group, Aerospace, Booz Allen Hamilton; First African-American female Naval Flight Officer
- **Tish Long,** INSA/INSF Chairman, First female director of a major intelligence

Marie Falkowski is the Chief of Digital Innovation in CIA's Weapons and Counterproliferation Mission Center. In this role, she leads the development and integration of enterprise digital solutions for one of the Agency's most enduring and rapidly-evolving mission areas. She has 30 years of combined federal and military service, and she led several substantive accounts as a collector and analyst within the Intelligence Community before shifting her focus to technology modernization and adoption in CIA. Prior to her current position, Ms. Falkowski served as the CTO for the Open Source Enterprise, where she transformed CIA's OSINT technical stack by leveraging commercial technology and private industry best practices, and aligning those to meet mission needs.

Cyber Essentials. US DHS
easytech4all.net | July 1, 2021 01:38 PM

https://easytech4all.net/cyber-essentials-us-dhs/?utm_source=pocket_mylist

Thank you to everyone who joined us for NOW + NEXT: Cyber Essentials. Click here to replay the webinar.

In the first portion of yesterday's event, Trent Frazier, CISA's Deputy Assistant Director, Stakeholder Engagement Division, and Bradford Willke, CISA's Senior Advisor for Stakeholder Engagement, gave an overview and discussed the six pillars of cyber essentials: Yourself, Your Staff, Your Systems, Your Surroundings, Your Data, and Your Crisis Response. In the second portion of the program, we invited a small business owner, Spencer Ferguson of Wasatch IT (and speaker at CO— Workshop Wednesday: Protecting Your Business from Cyber Threats), to share personal strategies when dealing with ransomware and best practices.

Resources:

Live Poll Results:

1) What's your breaking point when it comes to how a ransomware attack would affect your organization?

16% responded: We don't have one, because we are confident we can prevent, respond, contain, and/or recover without paying and without much of a blimp in operations.
25% responded: It might come down to how much we would have to pay, but we know what security and resilience information we will use to make those decisions during an attack.
54% responded: We can't or won't pay and we also don't know how bad things might get, but we have a recovery and/or restoration plan.
5% responded: We'll probably pay if it's not outrageous because we know it would be bad (i.e., highly impactful or disruptive and not an easy recovery).
2) Does your organization maintain comprehensive data backups that are regularly tested? Does your organization maintain backup copies offline?

64% responded: Yes, we maintain comprehensive data backups that are regularly tested.
54% responded: Yes, we maintain backup copies offline.
5% responded: No, we DO NOT maintain comprehensive data backups that are regularly tested.
5% responded: No, we DO NOT maintain backup copies offline.
3) Does business impact (analysis) factor into how your organization patches security vulnerabilities or how your organization implements automatic updates?

59% responded: Yes, business impact (analysis) factors into how my organization patches security vulnerabilities.
39% responded: Yes, business impact (analysis) factors into how my organization implements automatic updates.
20% responded: No, business impact (analysis) DOES NOT factor into how my organization patches security vulnerabilities.
27% responded: No, business impact (analysis) DOES NOT factor into how my organization implements automatic updates.
4) Has your organization developed and tested an incident response plan?

68% responded Yes
32% responded No

U.S. Chamber of Commerce

State of American Business 2022

Tuesday | January 11, 2022 | 11 AM ET

We are excited you will be joining us next week for the U.S. Chamber of Commerce's State of American Business 2022, taking place **Tuesday, January 11 at 11 AM ET.**

Here's What to Expect:

- **U.S. Chamber President and CEO Suzanne Clark will articulate that competition** — an essential force that drives achievement, innovation, and progress — is shaping a better future for all of us in her first State of American Business keynote address.
- **Plus, we will hear from leaders in the business community including:**
    - **Dr. Albert Bourla,** Chairman and CEO, Pfizer in conversation with **Dr. Michelle McMurry Heath,** President and CEO, Biotechnology Innovation Organization.
    - **Carol Tomé,** CEO UPS in conversation with **Chris Clark,** President and CEO, Georgia Chamber of Commerce.
- A conversation with **U.S. Senators Susan Collins** (Maine-R) and **Jeanne Shaheen** (New Hampshire-D), moderated by **Neil Bradley,** Executive Vice President, Chief Policy Officer and Head of Strategic Advocacy U.S. Chamber of Commerce.

INTELLIGENCE AND
NATIONAL SECURITY
ALLIANCE

We're sorry you were unable to log on for our program! Special thanks to Booz Allen Hamilton for their support. To catch up on anything you might have missed, click the program recording link below. For more information about the value of INSA membership, visit our website: https://www.insaonline.org/

Join us for upcoming INSA events with a panel discussion on Remote Work and a conversation with RADM Mike Studeman: https://www.insaonline.org/events/

A message from the webinar sponsor:

It was Booz Allen's esteemed privilege to introduce MG Michelle McGuinness and hear her insights on the criticality of intelligence sharing among the Five Eyes partners, as well as opportunities for enhanced collaboration. At Booz Allen, we believe that national security depends on staying ahead of the threat – which requires coordination and information sharing not only with our FVEY partners, but across our entire intelligence community. In order to address the challenges of today and prepare for next generation threats, we must apply deep mission understanding, and advanced technical acumen. This approach supports swift, informed decisions, and delivers outcomes. Booz Allen brings together the right technology, tradecraft, and cleared technical talent to solve the most impactful challenges and propel your mission forward. Learn more at www.boozallen.com/intel

CYBER SECURITY SUMMIT

Security solutions through collaboration.™

11th Annual Cyber Security Summit | October 25-27, 2021 | cybersecuritysummit.org

Closing Keynote, Oct 26th

DARRIN JONES

FBI Executive Assistant Director

11th Annual Cyber Security Summit

POWER & PERIL OF CONNECTION

October 25-27, 2021 | Register today at **cybersecuritysummit.org**

FBI Executive Assistant Director Darrin Jones confirmed as closing keynote, Oct 26

In an exciting new development for this year's virtual **11th Annual Cyber Security Summit**, FBI Executive Assistant Director **Darrin E. Jones** will close our Day 2 programming with his presentation, "The Lawful Access Challenge."

EAD Jones, who leads the FBI's scientific, operational technology, and criminal justice information sharing programs, will discuss the escalating risk posed by the lawful access to encrypted data challenge, which impedes the investigation and prevention of serious crimes such as online child exploitation and sexual abuse. His remarks underscore the shared interests between law enforcement and industry to ensure aggressive support and recommended use of strong, but responsibly managed encryption.

EAD Jones will also highlight the importance of continued cooperation and partnership in the international law enforcement community that is vital to address public safety and the national security challenges presented by modern communication services, applications, and devices.

It's yet another example of the high caliber thought leaders the Cyber Security Summit draws. We invite you to explore our **robust agenda** and our full state of presenters.

Join us **Oct 25-27** as we seek solutions together.

Nation-State Attacks and You

What are nation-state cybersecurity attacks, and why should you care about them?

Cybersecurity professionals at most critical infrastructure providers and defense-related organizations are familiar with such attacks. Cybersecurity professionals at other organizations are often less aware, because they mistakenly believe they won't be targets.

That's a mistake: Not only are a wide range of organizations (from not-for-profits to educational institutions to humdrum manufacturing plants) at risk, increasing your level of awareness and understanding of nation-state attacks is vital to understanding how cyberthreats will grow and evolve.

Nation-state actors are often sophisticated and well-funded, and they serve as bellwethers for attacks to come. Understanding them today can help your organization protect itself tomorrow.

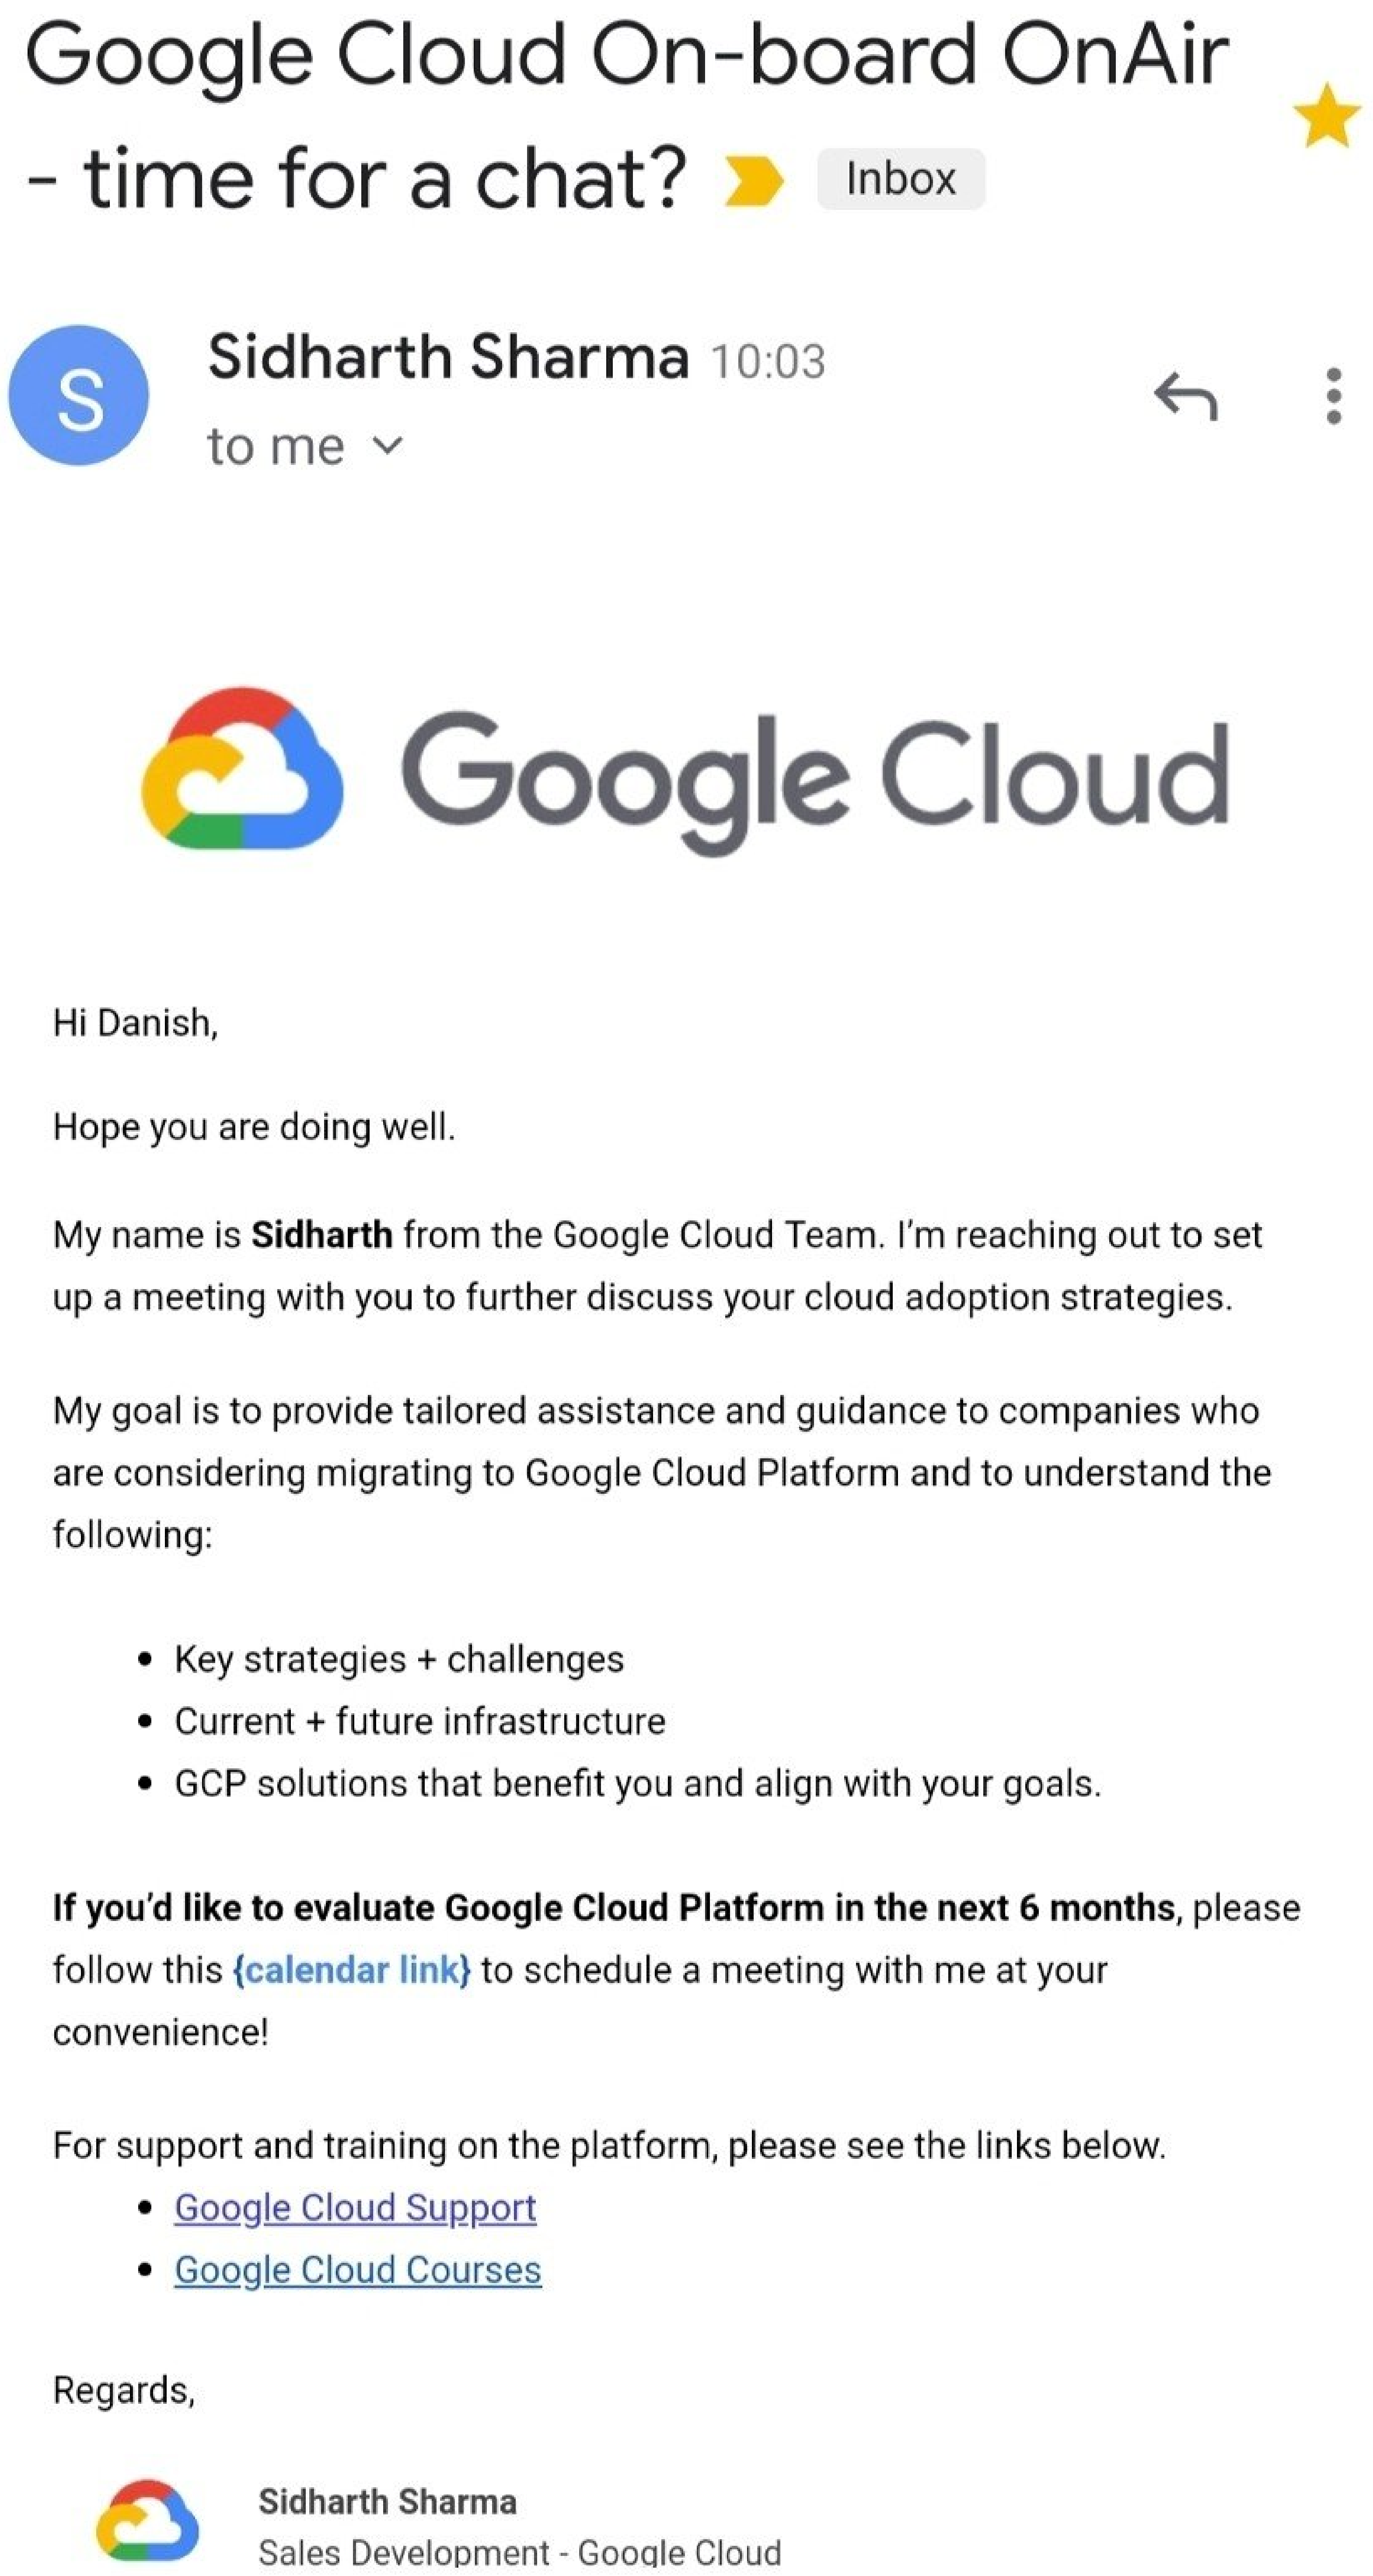
LinkedIn Survey Invitation

Dear Danish,

Thanks for being a member of LinkedIn! We would like to invite you to participate in a research study to understand the most important things in a job. Your feedback will be crucial in helping companies attract, motivate, and retain top talent.

We have a few qualifying questions to confirm your eligibility to complete the ~7 minute questionnaire.



Google Cloud On-board OnAir - time for a chat?

Sidharth Sharma 10:03
to me

Hi Danish,

Hope you are doing well.

My name is **Sidharth** from the Google Cloud Team. I'm reaching out to set up a meeting with you to further discuss your cloud adoption strategies.

My goal is to provide tailored assistance and guidance to companies who are considering migrating to Google Cloud Platform and to understand the following:

- Key strategies + challenges
- Current + future infrastructure
- GCP solutions that benefit you and align with your goals.

If you'd like to evaluate Google Cloud Platform in the next 6 months, please follow this **{calendar link}** to schedule a meeting with me at your convenience!

For support and training on the platform, please see the links below.

Ever wondered what Artificial Intelligence could do for your business?

Canonical | Ubuntu Yesterday

Hi Danish,

Artificial Intelligence has already begun to revolutionise business and open up a competitive advantage to those who have begun to implement it. Those unwilling to adopt it risk being left behind.

Join our upcoming webinar 'How to start and progress with an AI program'. Whether you're just beginning to explore what AI can do for your business or have developed machine learning models you're looking to deploy in production at scale this webinar will provide an overview of what you need to achieve your goals.

In this webinar you will also learn:

- Which AI solutions are ready for production and for which applications.
- About open-source state-of-the-art frameworks and pre-trained models ready to be deployed with minimal effort to realise your intelligent automation objectives.
- About current advancements and limitations in a technology moving at an unprecedented pace, powered by big data, advanced algorithms and infinite cloud resources.
- How you can manage change and prepare for the impact to your people.

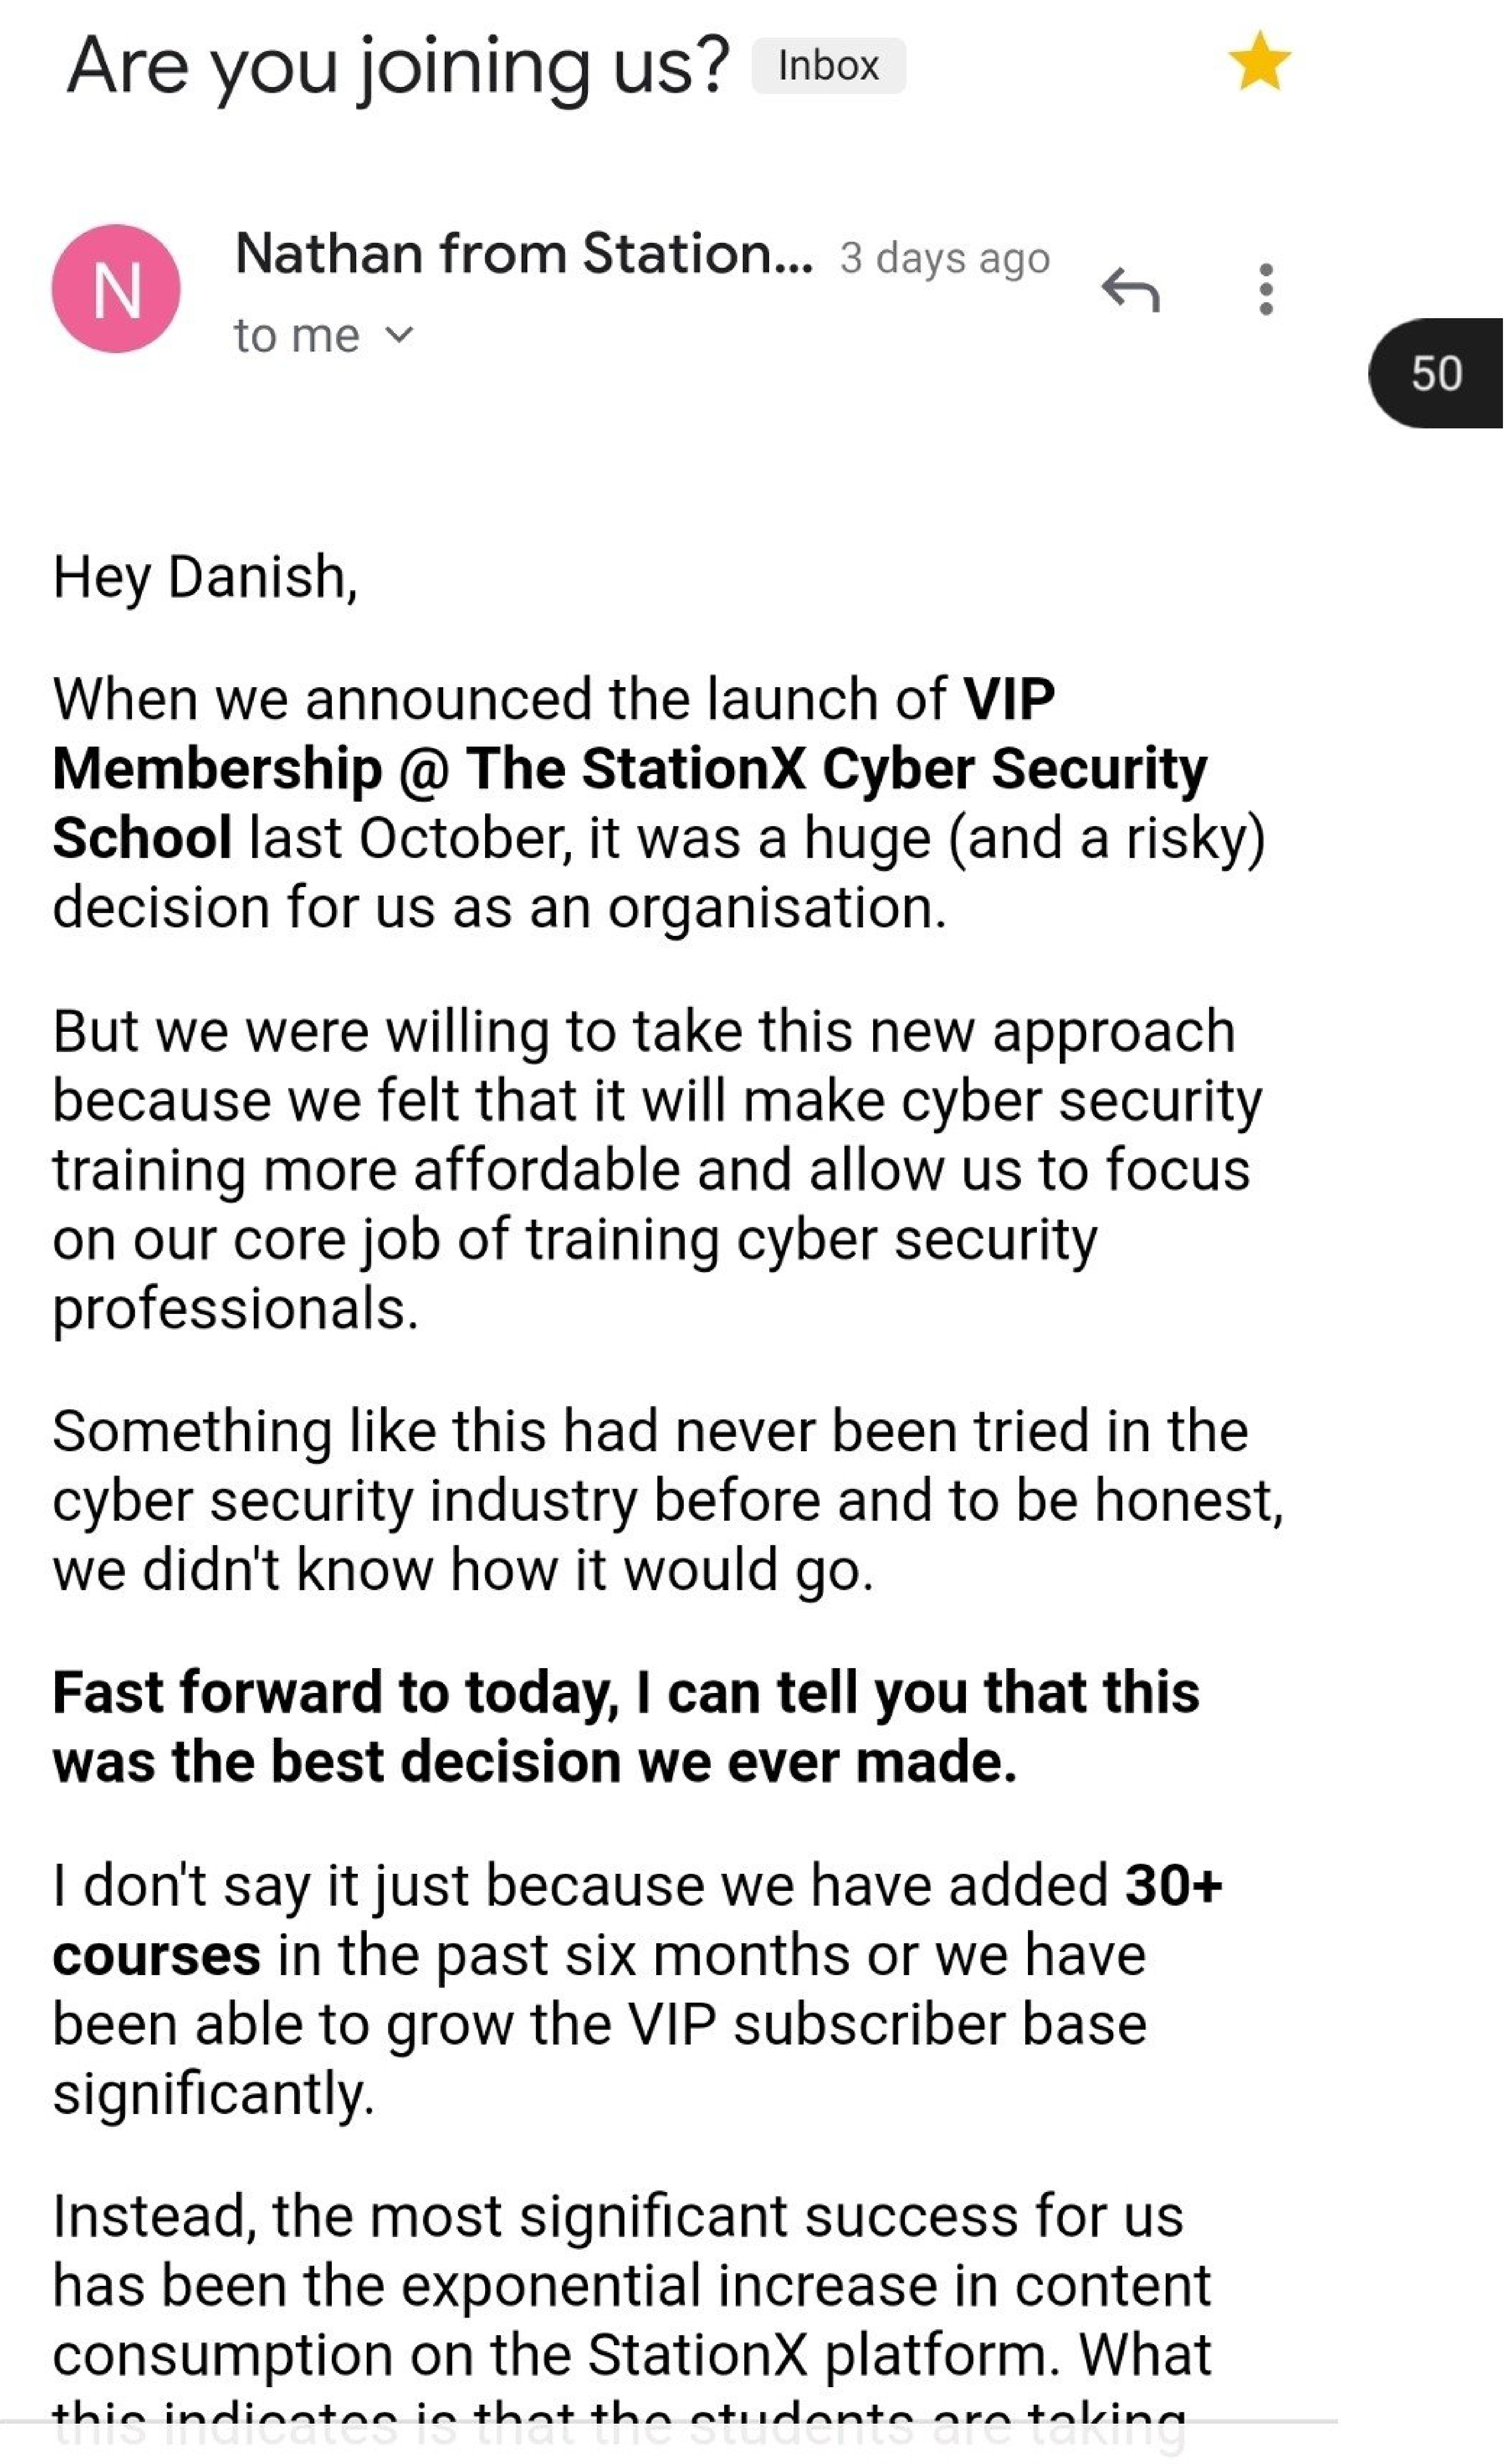
Alyssa Downing Yesterday
to me

Dear Danish,

Thank you for registering for "Insider Threat & Economic Espionage Trends in Asia Pacific".

Presenter: Eric Lackey, Principal Advisor

Diverse geopolitical and economic interests of the states within Asia Pacific (APAC) play a significant role in shaping cyber threat activity



Are you joining us?

Nathan from Station... 3 days ago
to me

Hey Danish,

When we announced the launch of **VIP Membership @ The StationX Cyber Security School** last October, it was a huge (and a risky) decision for us as an organisation.

But we were willing to take this new approach because we felt that it will make cyber security training more affordable and allow us to focus on our core job of training cyber security professionals.

Something like this had never been tried in the cyber security industry before and to be honest, we didn't know how it would go.

Fast forward to today, I can tell you that this was the best decision we ever made.

I don't say it just because we have added **30+ courses** in the past six months or we have been able to grow the VIP subscriber base significantly.

Instead, the most significant success for us has been the exponential increase in content consumption on the StationX platform. What this indicates is that the students are taking

Dear Danish,

There are plenty of cybersecurity and compliance solutions—too many, in fact. CISOs and their teams are drowning in data, but they have a hard time identifying which tools actively improve their risk posture, and which are, at best, expensive window-dressing.

This webinar highlights the importance of threat-informed defense, and applies it to the notion of enterprise risk optimization. We'll discuss how CISOs and their teams can use threat-informed

Hear From Tom Kartanowicz, CISO Americas, Commerzbank AG

Seth Adler Yesterday

Hi Danish,

In just under 4 weeks, hundreds of security and IT professionals will come together ONLINE for two days to hear from their peers and pose questions related to the current and future state of Cyber Security in Financial Services. And if you are not in FS, there is still a great opportunity to hear from thought leaders in an industry that has stringent regulations and must be incredibly vigilant with their cyber security hygiene.

Register to join your peers on September 15-16 ONLINE at the **Cyber Security Digital Summit – Financial Services**.

SECURE YOUR COMPLIMENTARY PLACE

You'll have the opportunity to hear from Tom Kartanowicz, CISO Americas, Commerzbank AG on ***Realtime Business Continuity Management For GRC***.

Other sessions include:

Intent Data:

Behavior and Context

Hi Danish,

Intent data is powerful. It's proven to impact go-to-market strategies and prioritize commercial teams but the key to success is in the details. Learning how to use this data is easier said than done, but well worth the time.

Join us on August 20th for **Intent Data: Behavior and Context** as David Pitta (BrightTALK, CMO), Val-Pierre Genton (BrightTALK, VP Corporate Development) and Ashley Goodwin (Confluent, Public Sector Marketing) dive into the intent data landscape, along with how you and your company can start leveraging this data effectively.

In this session, we'll cover:

- What is 'intent' across 1st, 2nd and 3rd party platforms
- How to operationalize for marketing and sales activities
- How to measure performance and scale

Your place is confirmed

Exclusive Invitation

Dear Danish,

Today's world is facing **new business problems** which need a **new generation of professionals** who can face these challenges on the private and public sectors. Both companies and governments need qualified professionals that can help them to discover actionable insights and to secure their data.

Data Scientists, Security Analysts, Chief Information Officers, or Chief Data Officers are just some examples of the type of roles that are needed nowadays and will continue growing with the digital transformation that we are experiencing.

Learn more about the skills **shortage on data science and cybersecurity** and why experts like Forbes says that "Data Scientist was one of the 10 toughest job positions to fill in 2016" or Michael Brown, CEO at Symantec says that "The demand for cybersecurity workforce is expected to rise to 6 million globally by 2019".

AGENDA Transform your career through Data Science and Cybersecurity
Marriott Marquis City Center Doha Hotel, Omar Al Mukhtar Street, Building No. 60, Area 61, Al Dafna, Street #850, P.O. Box 25500
Tuesday, October 31, 2017
From 19:00 To 20:30

Come and learn more about the jobs of the future with **Marcos Ramirez, Senior Associate Driector of Data Science and Technology** programs at IE. Check out how IE is delivering the needed skills to tackle this new business challenges which are part of the 4th Industrial Revolution in which we live.

Looking forward to meeting you on the event.

Internet Society™

Dear Danish Khan,

The Internet Society Asia-Pacific (APAC) Bureau would like to invite you to participate in a Regional Webinar scheduled for December 17th from 13.00 to 14.00 hours (Singapore Time, UTC +8). This webinar has been specially designed for Internet Society Members; those interested to know more about our regional work and are keen to support our efforts in their local communities.

The APAC Bureau team will discuss some of its key activities in the region this year, and seek your views on what you see as major issues of concern on regional Internet related topics going into 2015.

Agenda:

1300-1310: Brief introduction of the APAC Bureau Team

1310-1325: 2014 the year that was

1325-1350: Open discussion on regional Internet related issues going into 2015

1350-1355: Regional activities planned for 2015

Mitigate cyber risks with next-generation technologies

HI Danish,

As cyber breaches become increasingly imminent regardless of your preventive measures, you need a resilient data protection and recovery solution purpose-built for cyber disruptions and aligned with today's more evolved and targeted attacks.

The technology building blocks that make up the IBM® Cyber Incident Recovery solution provide a platform that spans compute and data layers of both production and DR environments to enable an agile approach to recovery from a cyber disaster. This architecture includes:

- Air-gapped protection to help prevent corruption of backup data
- Immutable storage that doesn't allow changes to backups
- Validation to help ensure backup data is clean and recoverable
- Copy data management to help enable rapid restoration
- Orchestration and automation to limit human error

Read the technical brief ➔

Get the details on how IBM® Cyber Incident Recovery, powered by IBM Resiliency Orchestration, can help you rapidly recover platform configurations, applications and data in the event of a cyber outage.

Read the Forbes Insights Study ➔

Download the report for analysis from Forbes Insights on the urgency of transforming continuity strategies to include all mission-critical applications.

Private Cloud, Open Admiration

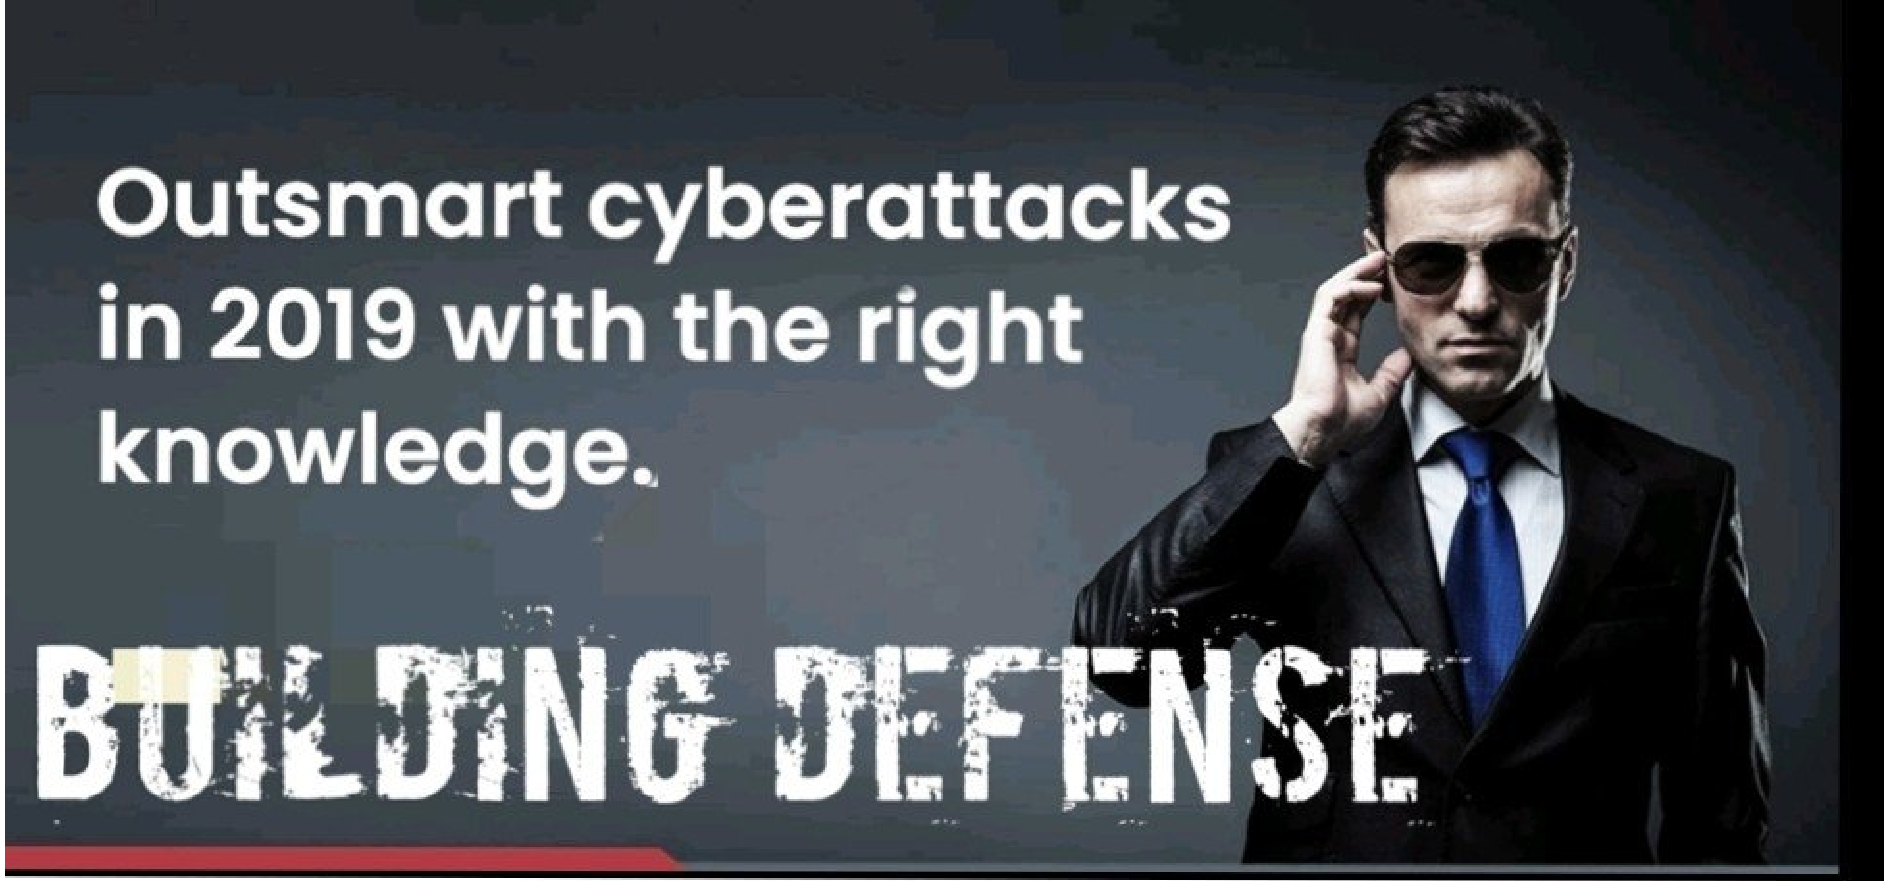
Hi Danish,

Are you looking to apply the benefits of the cloud to systems you already have on premises?

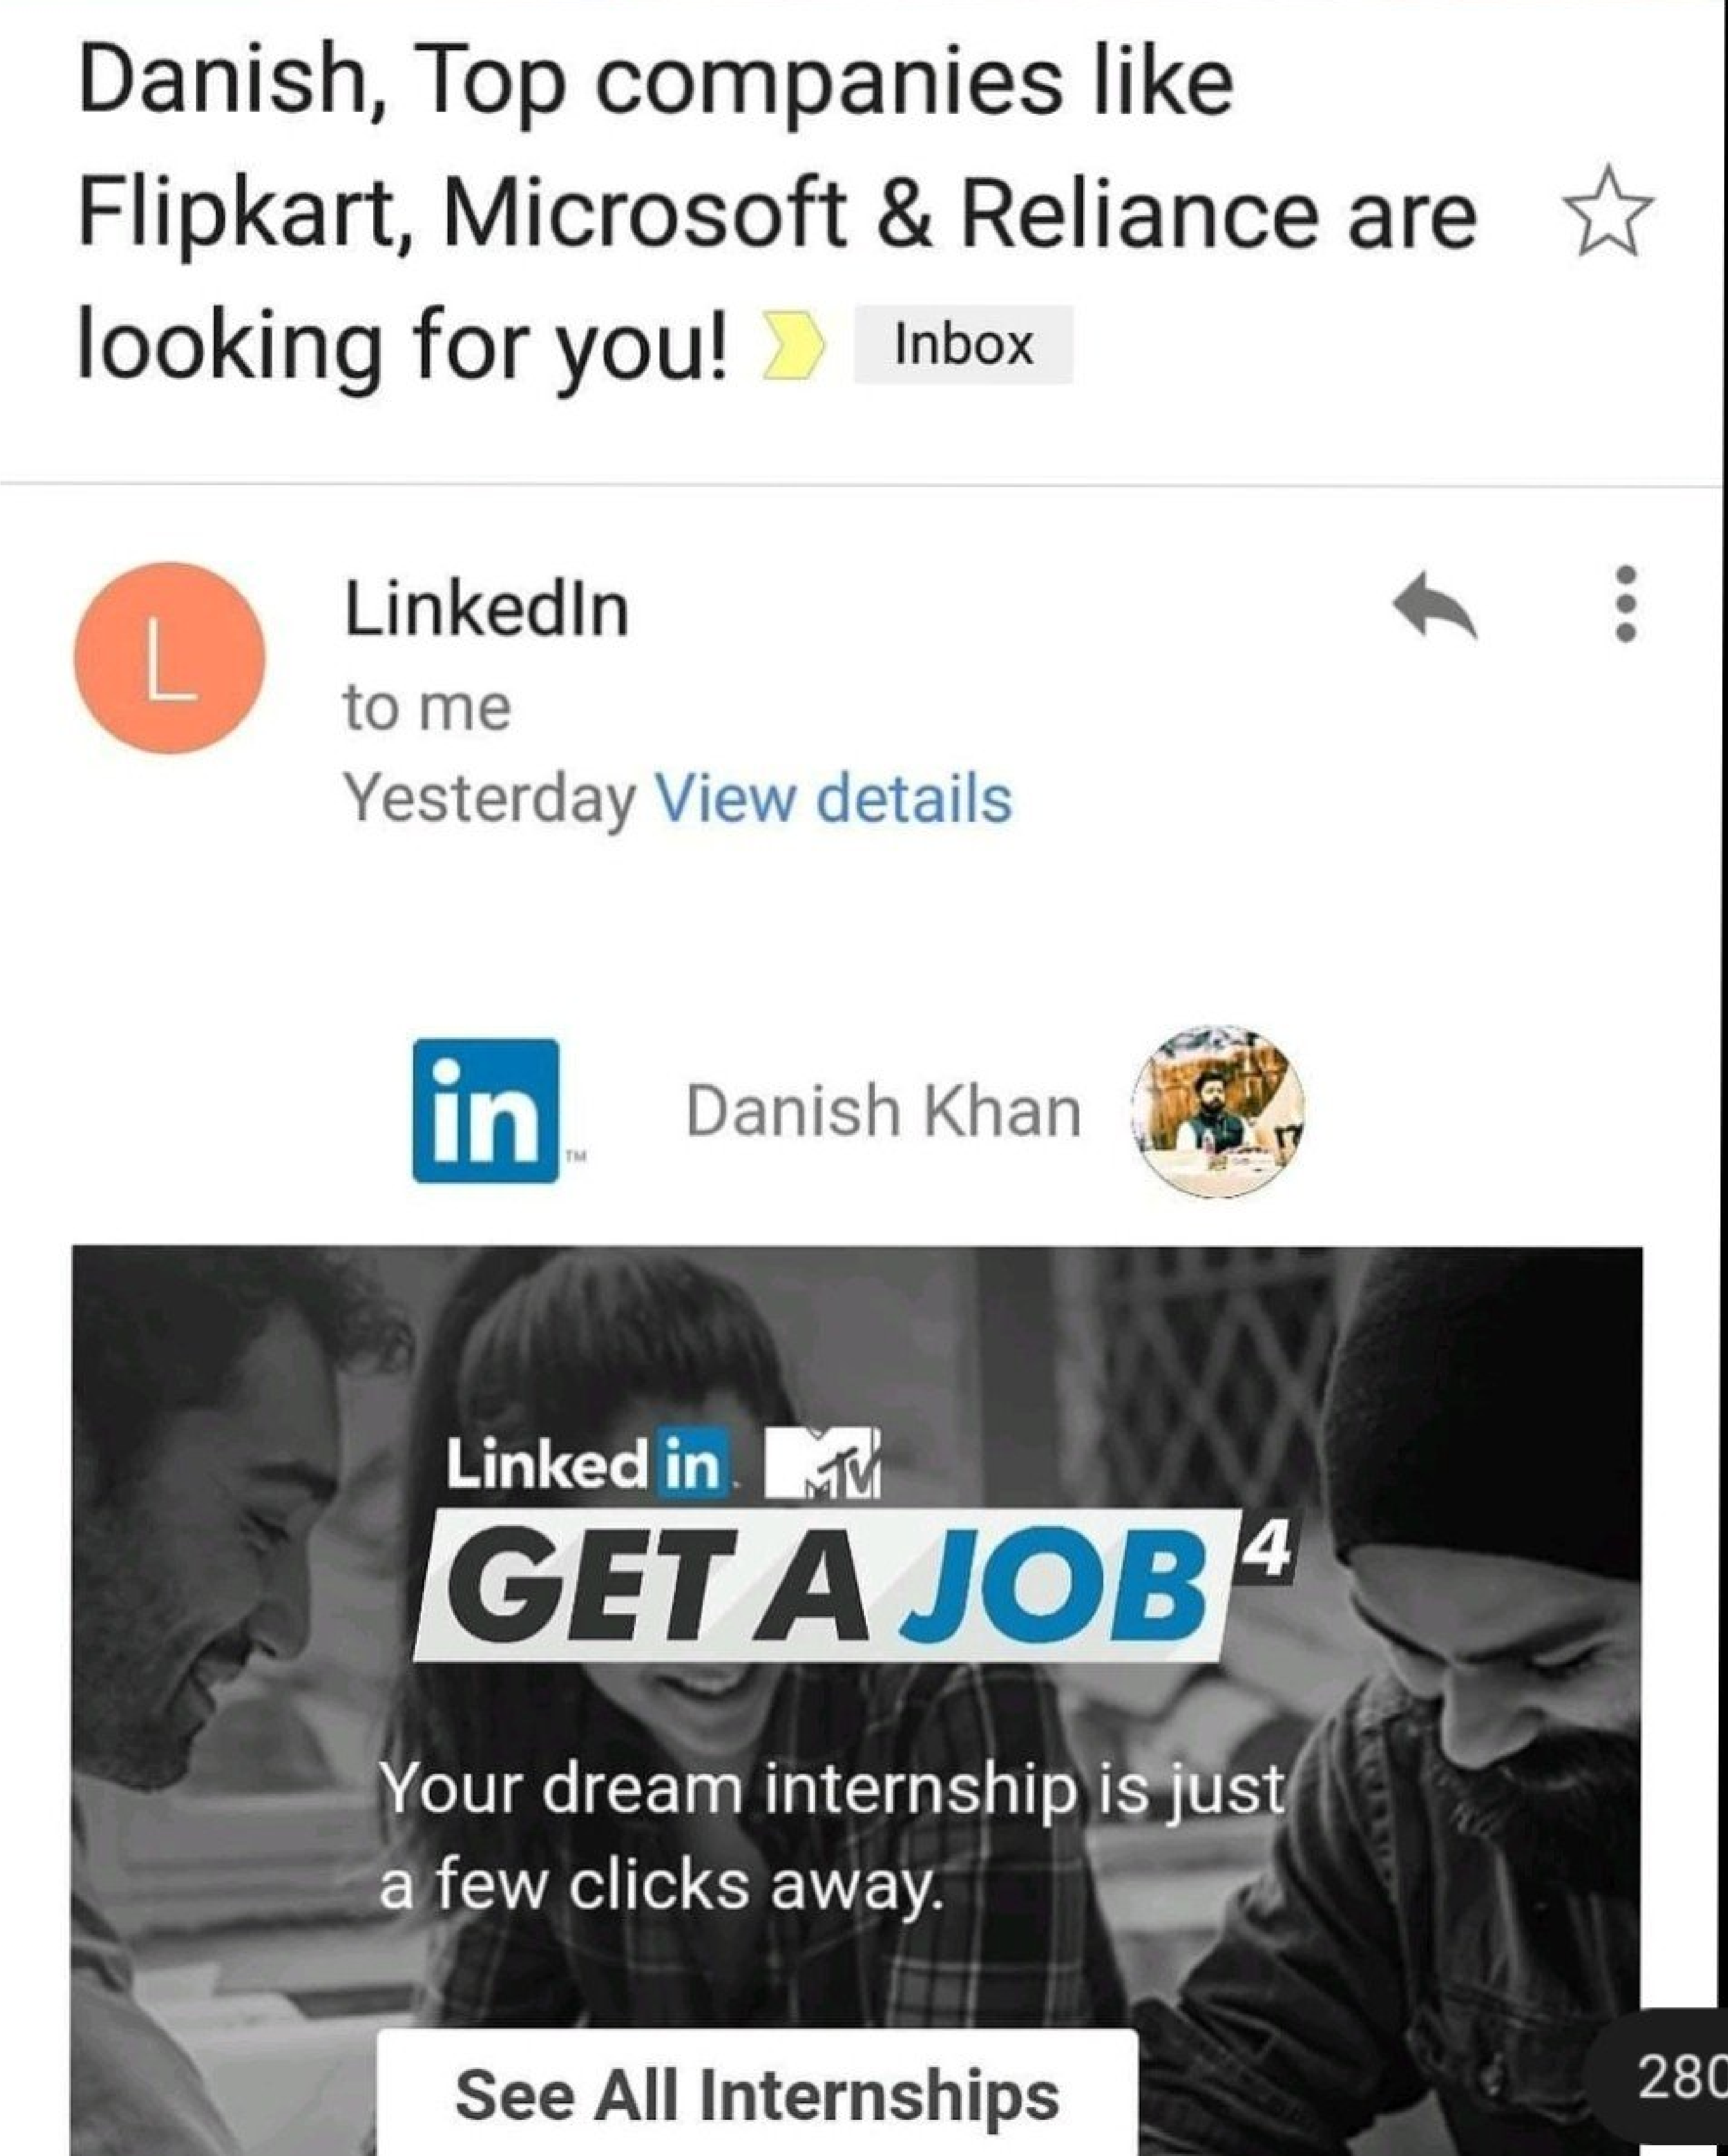
IBM brings to you, IBM Cloud Private (ICP), an enterprise-grade, Artificial Intelligence ready platform to modernise business apps with public Cloud services without starting from scratch, and run them in a multi-cloud environment.

IBM Cloud Private provides an integrated environment for managing containers that include the container's orchestrator Kubernetes behind a firewall, private image repository, a management console, and monitoring frameworks. You can design, develop, deploy, and manage on-premises, containerised cloud applications behind your firewall.

If questions like ‘transformation’ or ‘protecting existing investments’ are on your mind, you will find several reasons to try **IBM Cloud Private – enterprise-grade, AI ready, secure to the core, and built with an open source approach.**



Outsmart cyberattacks in 2019 with the right knowledge.
BUILDING DEFENSE



Danish, Top companies like Flipkart, Microsoft & Reliance are looking for you!

Join AWS Migration Webinars

Hi Danish,

Cloud migration is a critical step towards digital transformation, innovation and operational resilience. It enables forward-thinking organizations to keep up with the rate of change and scale, to meet future needs.

Join the AWS Cloud Migration Webinar Series on **22-24 May** and learn how you can retire your technical debt and increase focus on innovating for customers. We will also cover best practices and customer use cases.

Webinar topics will include:

- Accelerating your migration to AWS
- AWS Services for Data Migration
- Retiring Technical Debt and leveraging existing Microsoft licenses on AWS
- VMware Cloud on AWS – Innovation with Hybrid Cloud
- Simplify Migration with SAP on AWS
- Migrating Your Databases to Amazon Aurora
- Move Oracle Applications, Middleware and Databases to AWS

We look forward to engaging you during the webinar sessions.

Hi Danish,

Thanks for signing up to receive the **Cyber Security Awareness Checklist**!

Updated for 2019, we've included the newest cyber security threats your organization might encounter and added a few challenges that even the savviest technology users may fail to consider—on and offline.

You can download the Cyber Security Awareness Checklist here:

With **the average cost of a data breach reaching $3.62M**, there's no better time than now to get serious about cyber security; it's not just for the IT team to worry about. It takes an entire organization to stay secure

What questions can I answer for you about cyber security or any
these 28 threats?

North Carolina has momentum

Dear Danish,

My name is Korey Howard. I am the representative for the State of North Carolina in India. As you look toward the future and consider expansion in the United States, I thought you might like to know a few key benefits that North Carolina has to offer.

Named the 2017 #1 best state for business by *Forbes* magazine and the #1 state for women in tech, North Carolina has momentum. Here, success is fueled by a competitive tax rate (the lowest in the United States), a favorable legal and regulatory environment, the largest research park in North America, and a robust university system that includes Duke University, the University of North Carolina at Chapel Hill, and North Carolina State University. Every day, our creative workforce – strengthened by 22,000 STEM graduates per year – is propelling innovation forward.

I'd love to discuss the opportunities that await your business here and the ways that the Economic Development Partnership of North Carolina can support your plans for growth. Please let me know when you might be free. Contact me today – Korey.howard@edpnc.com

Event Overview
Humankind experienced three industrial revolutions along history – all of which raised global income levels and improved the quality of life for society around the globe. Today's fourth industrial revolution is driven by exponential growth in computing power and data. Automation, that is supported and improved by AI, for many industries, however, is still in its infancy. Those organisations that exploit AI fast, this powerful technology will soon become the new norm. This will result in gaining strong competitive edge by

Danish
these are fabulous. you are just brilliant. many thanks.

Having said that let me also say the real challenge for us would be to choose what is essentially to be conveyed to the audience given the limited time we will be having. So my humble suggestion would be to keep your presentation on education limited to say 5-8 slides. its important to provide a robust idea how education could be instrumental in eradicating poverty much faster and effectively with its positive impact on so many areas you have brilliantly laid out.

Your poverty infographics are again brilliant (only thing is there are too much information that will be difficult for people to digest and also may get confused). I assume these are suitable for the first presentation- and i am tempted to use some of them (i am sorry i cant separate either page or slide wise) and i need to talk to you on this how to keep some key stats and messages so that people can absorb. I like the last humanity slide being very powerful.

Kindly let us know how do you think about. statistics are ery powerful tools only when they are selectively utilised.

Hi Danish,

We're glad you joined us at **Cloud OnAir: Remote Working with G Suite**.

In recognition of your attendance, we are pleased to present you with your digital **eCertificate of Participation** below.

We'd love to hear your feedback about the sessions on Day 2 of the event. Please fill out this short survey. This is the same survey shared after the last session of the day, so no need to submit twice if you have already.

All eight sessions and Q&As from both Day 1 & 2 of this online event are now available to view on-demand. You can playback any sessions that you'd like to review, or share the recordings with your team or colleagues.

If you have further questions about remote work and G Suite, you can contact us (select "I want to talk to someone") and fill out the form or give us a call.

See you in the cloud,
The Google Cloud Team

Economic Development Partnership of North Carolina • 12:43 pm

North Carolina has momentum

Dear Danish,

My name is Korey Howard. I am the representative for the State of North Carolina in India. As you look toward the future and consider expansion in the United States, I thought you might like to know a few key benefits that North Carolina has to offer.

Named the 2017 #1 best state for business by *Forbes* magazine and the # state for women in tech, North Carolina has momentum. Here, success is fueled by a competitive tax rate (the lowest in the United States), a favorable legal and regulatory environment, the largest research park in North America, and a robust university system that includes Duke University, the University of North Carolina at Chapel Hill, and North Carolina State University. Every day, our creative workforce – strengthene by 22,000 STEM graduates per year – is propelling innovation forward.

I'd love to discuss the opportunities that await your business here and the ways that the Economic Development Partnership of North Carolina can support your plans for growth. Please let me know when you might be free Contact me today – Korey.howard@edpnc.com

Kind regards,

Korey Howard

David Goodstein · 3:38 AM

Thank you for connecting! I saw that your company has some content around Artificial Intelligence. Looks very interesting! We are actually putting together a webinar series here for our members focused on these topics. We thought you may be a good fit to sponsor this series and brief our members on your story, customer case studies and generate exposure and opportunities from our network . We are a professional association & industry media organization with 100,000 members globally focused on providing education, networking opportunities, guidance and proactive resources in the Robotic Process Automation, AI, & Digital Enterprise Transformation industries. Is this worth a conversation?

Regards,
David

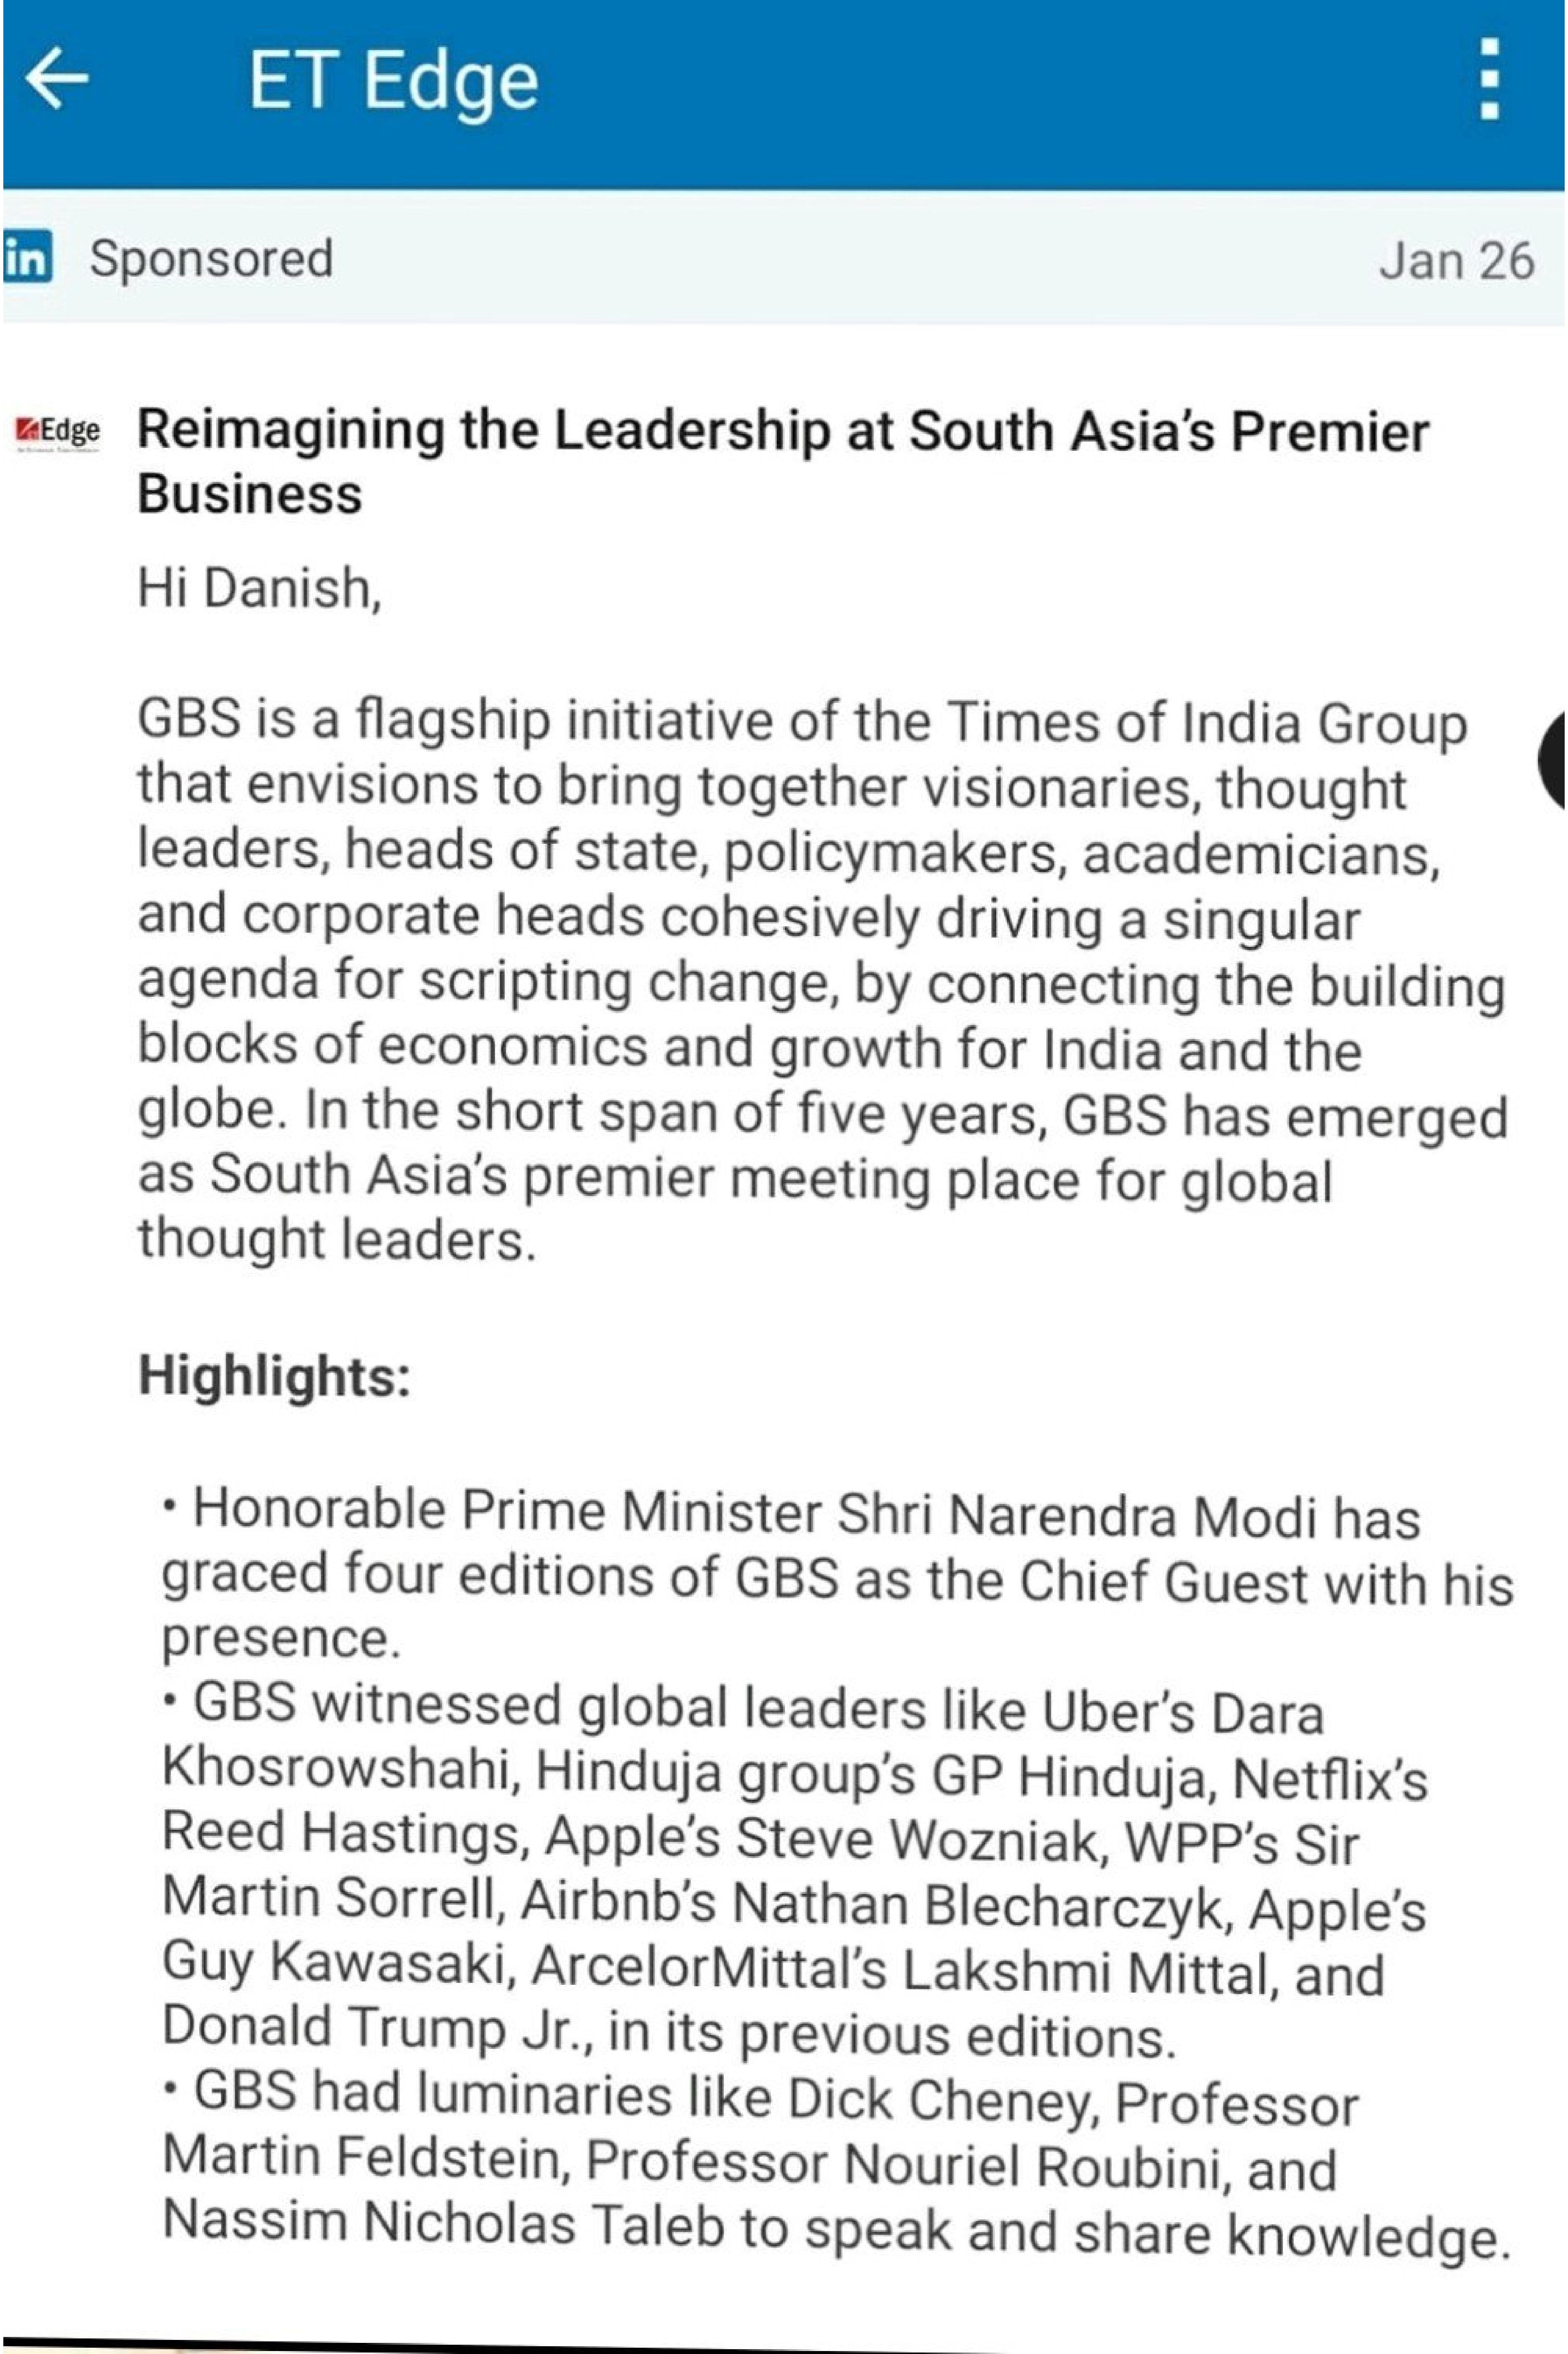
Let me know if this of interest and I can send along some materials for your review.



Reimagining the Leadership at South Asia's Premier Business

Hi Danish,

GBS is a flagship initiative of the Times of India Group that envisions to bring together visionaries, thought leaders, heads of state, policymakers, academicians, and corporate heads cohesively driving a singular agenda for scripting change, by connecting the building blocks of economics and growth for India and the globe. In the short span of five years, GBS has emerged as South Asia's premier meeting place for global thought leaders.

Highlights:

- Honorable Prime Minister Shri Narendra Modi has graced four editions of GBS as the Chief Guest with his presence.
- GBS witnessed global leaders like Uber's Dara Khosrowshahi, Hinduja group's GP Hinduja, Netflix's Reed Hastings, Apple's Steve Wozniak, WPP's Sir Martin Sorrell, Airbnb's Nathan Blecharczyk, Apple's Guy Kawasaki, ArcelorMittal's Lakshmi Mittal, and Donald Trump Jr., in its previous editions.
- GBS had luminaries like Dick Cheney, Professor Martin Feldstein, Professor Nouriel Roubini, and Nassim Nicholas Taleb to speak and share knowledge.

Dear Danish,

I am delighted to announce that the registration to the 8th Blockchain Economic Forum in Davos, Switzerland is open! The BEF will be held on January 20-24th, 2020.
The website with the full agenda:
https://bef.latoken.com/davos2020

You may apply for the registration at http://bit.ly/2L0GotP.

Our speakers included 2 presidents, finance ministers, ex CFTC Chairman, FED and EU Parliament members, $80bln+ funds (check their impressions at https://www.youtube.com/watch?v=L0aWY9ETD9k).

If you are interested in getting an exclusive "all-in-one" solution (hotel accommodation with top speakers/investors, daily transfers, registration to BEF, Davos Forum + side events) - let me know, we have 8 rooms left

Hope to meet you at the BEF in Davos!

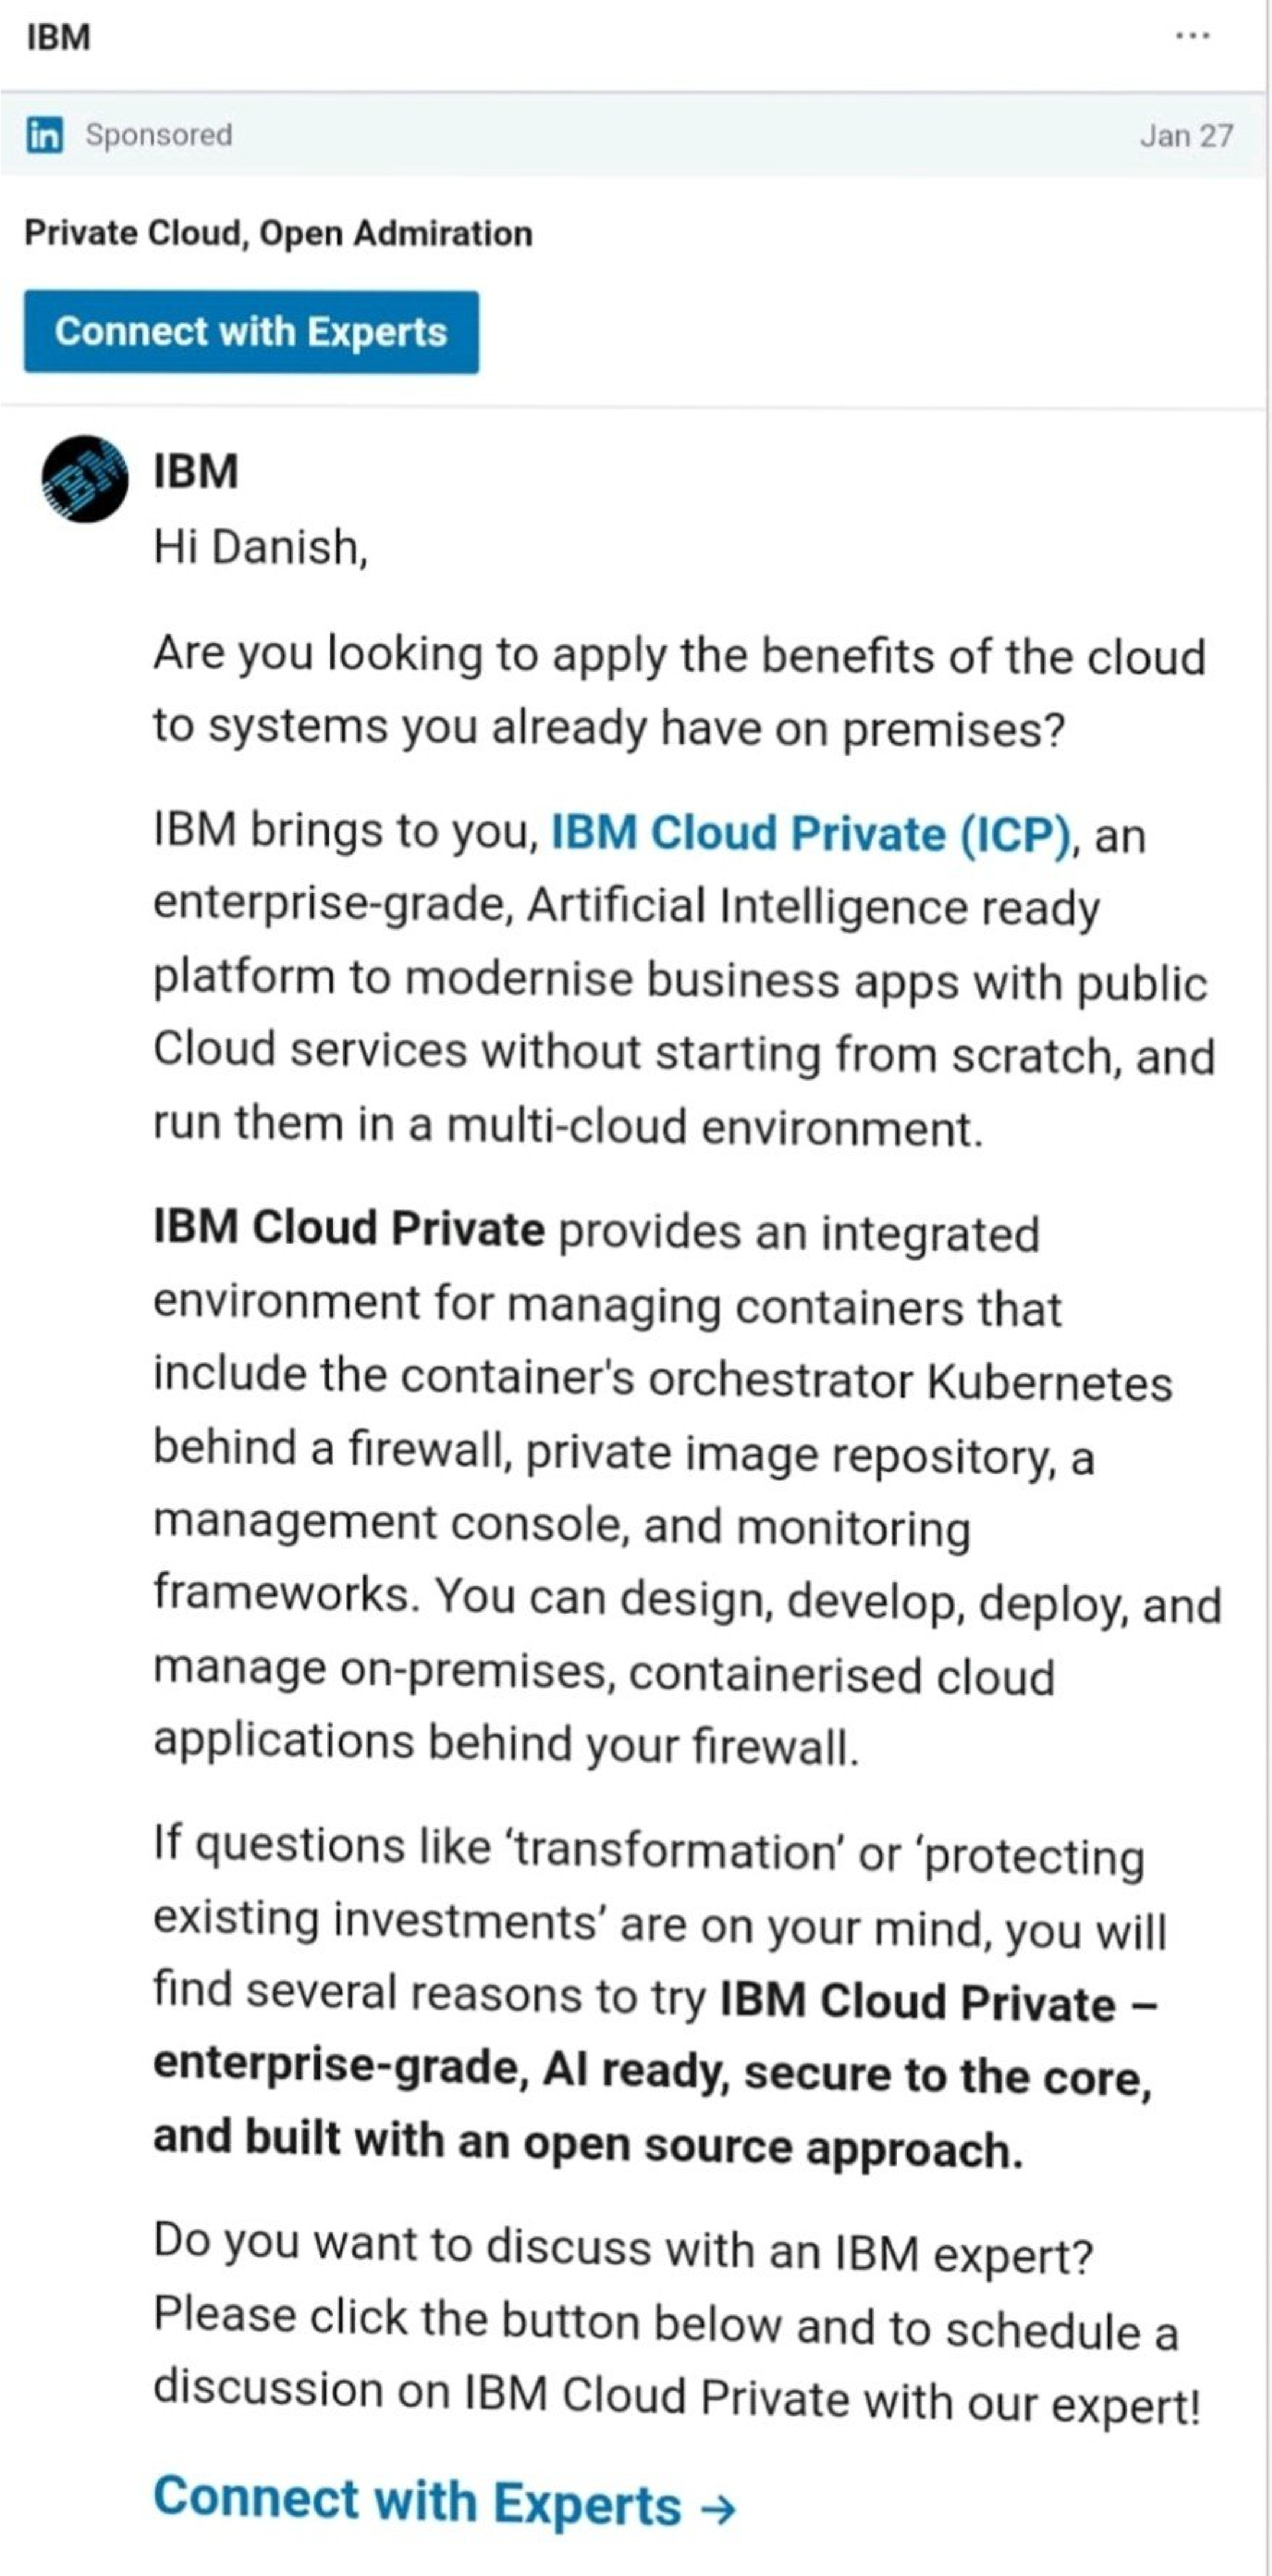
ATZlive The Powertrain of Tomorrow 2019

Dear Danish Khan,

At the last MTZ Conference on “The Powertrain of Tomorrow” held in January 2018, we found a powertrain mix that can ensure mobility with carbon-neutral emissions and without further pollution of the atmosphere. This broad range of powertrains was made up of internal combustion engines operated with or without regenerative liquid or gaseous fuels, hybrid and plug-in hybrid drive systems, and fuel cell systems.

- Do we need this diversity of powertrains in order to achieve the climate protection and air quality targets?
- What role will combustion engines play in electrified powertrains?
- How can their interaction be further perfected in the powertrain system?

We invite you to meet at the **Gesellschaftshaus Palmengarten** in **Frankfurt/Main** in **January 2019** to discuss these and other engine development issues with international experts.



Private Cloud, Open Admiration

IBM

Hi Danish,

Are you looking to apply the benefits of the cloud to systems you already have on premises?

IBM brings to you, **IBM Cloud Private (ICP)**, an enterprise-grade, Artificial Intelligence ready platform to modernise business apps with public Cloud services without starting from scratch, and run them in a multi-cloud environment.

IBM Cloud Private provides an integrated environment for managing containers that include the container's orchestrator Kubernetes behind a firewall, private image repository, a management console, and monitoring frameworks. You can design, develop, deploy, and manage on-premises, containerised cloud applications behind your firewall.

If questions like ‘transformation’ or ‘protecting existing investments’ are on your mind, you will find several reasons to try **IBM Cloud Private – enterprise-grade, AI ready, secure to the core, and built with an open source approach.**

Do you want to discuss with an IBM expert? Please click the button below and to schedule a discussion on IBM Cloud Private with our expert!

Optimize your hybrid cloud strategy to meet current & future

Hello Danish,

In the data era, evolving enterprise IT to satisfy dynamic business demands is a necessity. To accelerate innovation and deliver competitive service differentiation, businesses must adopt a data-driven model. This is why forward-thinking enterprises are increasingly adopting a hybrid-cloud approach.

To help you make the critical decisions that will determine the success of your hybrid cloud strategy, William Giard (CTO for IT Transformation, Data Center Group at Intel) offers expert insights on the importance of workload optimization and deployment location.

Gain 60% lower TCO over 4-year-old servers with Intel® Xeon® Scalable processors[1] and unlock the power of a future-ready hybrid cloud to accelerate your business transformation.

Sincerely,
Intel

Dated: 9th of October 2014

Sub: Invitation for Workshop on **"Reaching the last mile"**, on 13th **October 2014 at Delhi.**

Respected Sir,

Trickle Up Program Inc. is an International Development Organization (www.trickleup.org), head-quartered at New York, USA and working in India, Guatemala, Mexico and West Africa. Since its inception (1979), Trickle Up is engaged in bringing livelihood opportunitiesto the people living in ultra-poverty. Trickle Up exclusively works with women of the ultra-poor families to take the households first step out of poverty.

Currently Trickle Up is implementing its Ultra-poor Program in West Bengal, Jharkhand and Orissa in Indiathrough partnering with local level NGOs in each State. Presently, where Trickle Up is implementing its Ultra-poor Program reaches out to 5000 households living in extreme poverty spread over 8 districts. The main aim of this Ultra-poor program is to ensure the Sustainable Livelihoodsof households living under ultra-poverty through promoting sustainable livelihood options by intervening in agricultural and allied field along with integrated natural resource promotion. Additionally we integrate health, gender and other such issues which are contributing factors to poverty. We collaborate with several International Organizations like Ford Foundation, Metlife, etc to reach our goal.

In this context, Trickle Up wants to introduce its workand experience through graduation program ***(in Project- Pathways out of Poverty for India's Ultra Poor under The Ford Foundation grant)***with key policy and decision making Govt. officials, corporate and International Agencies to explore some opportunitiesto engage these different organizations in effectively targeting ultra-poverty and ensure greater access to the big scale flagship programs like MGNREGA and NRLM for the population living in extreme poverty section.

In this regard, Trickle Up would like to invite you as a valued guest in a one day-workshop**- *"Reaching the Last Mile"***on 13th October2014**(9.30 am to 3.30pm)**, in New Delhi which could pave the way for better solution in the life of ultra-poor people.

We would appreciate to have your confirmation as early as possible.

With regards

Amalendu Pal

Asia Regional Representative

Exclusive Invitation

Dear Danish,

Today's world is facing **new business problems** which need a **new generation of professionals** who can face these challenges on the private and public sectors. Both companies and governments need qualified professionals that can help them to discover actionable insights and to secure their data.

Data Scientists, Security Analysts, Chief Information Officers, or Chief Data Officers are just some examples of the type of roles that are needed nowadays and will continue growing with the digital transformation that we are experiencing.

Learn more about the skills **shortage on data science and cybersecurity** and why experts like Forbes says that "Data Scientist was one of the 10 toughest job positions to fill in 2016" or Michael Brown, CEO at Symantec says that "The demand for cybersecurity workforce is expected to rise to 6 million globally by 2019".

Resiliency

Mitigate cyber risks with next-generation technologies

HI Danish,

As cyber breaches become increasingly imminent regardless of your preventive measures, you need a resilient data protection and recovery solution purpose-built for cyber disruptions and aligned with today's more evolved and targeted attacks.

The technology building blocks that make up the IBM® Cyber Incident Recovery solution provide a platform that spans compute and data layers of both production and DR environments to enable an agile approach to recovery from a cyber disaster. This architecture includes:

- Air-gapped protection to help prevent corruption of backup data
- Immutable storage that doesn't allow changes to backups
- Validation to help ensure backup data is clean and recoverable
- Copy data management to help enable rapid restoration
- Orchestration and automation to limit human error

Read the technical brief →

Welcome to the Solution Exchange for the Climate Change Community

Dear Mr. Danish khan,

I would like to welcome you to **Solution Exchange for the Climate Change Community in India**. We are very happy to have you on board and look forward to your active participation.

You will appreciate that climate change is a huge field affecting almost all facets of human activity. Naturally, the issue of climate change is very rapidly gaining utmost importance, both amongst the practitioners in the field and the public at large.

At present, there is no credible discussion forum in India, where experts & practitioners can share their experiences and knowledge and help each other in addressing the myriad aspects of climate change. The Climate Change community of Solution Exchange, facilitated by UNDP is an attempt to address this gap.

Below, you will find the basic information and some "time saving tips" on how to participate effectively in the Community's mail group. If you haven't done so earlier, please take some time to review the Membership Agreement, containing the **Rules of Participation** in the Community, the **Terms and Conditions** of Use for the mail group and website, and the **Privacy Policy**.

As the Resource Person and the Moderator for the Climate Change Community, I am responsible for organizing its activities and moderating the Community's mail group as well. I look forward to your cooperation and support to make this challenging task a rewarding one.

Please do not hesitate to contact me in case you have any questions or concerns. Your feedback, comments or suggestions are most welcome to make this Community active, useful and vibrant. We hope you will participate actively in the discussions and suggest issues of importance that the Community needs to pursue. We strongly believe that through sharing of knowledge and working collaboratively we could work towards achieving the MDG targets in India and ensure to the extent possible, that the adverse impacts of climate change do not act as impediments to our growth.

With best regards,

An exclusive invitation for you

Dear Danish,

Based on your profile, you're exclusively invited to apply for membership to our Indian Chapter of Leaders Excellence at Harvard Square, **an exclusive, invitation-only club** for leaders.

If approved, you'll become a certified member of a highly selective members' club located at Harvard Square. Get access to a host of powerful benefits that help you build your professional network, discover new opportunities and advance your leadership.

You'll be in good company, too: Join **500+ top Indian leaders** in mid- to senior level management from Tata, Microsoft, SAP, Oracle, IBM, Ericsson, Novartis, Barclays, HSBC, Citibank, RBI, KPMG, PwC, Deloitte, Accenture and other leading organizations.

Exclusive, members-only benefits:

- **Gain a distinctive credential**: Receive an official, uniquely numbered membership certificate and use of the MLE$^{\text{SM}}$ title, a MA-registered service mark.
- **Build your leadership capabilities** through online, face-to-face sessions where our executive coach will challenge you on skills for workplace success.
- **Gain valuable insights** through relevant resources on driving organizational and personal growth through strategic leadership.
- **Build long-lasting and beneficial business relationships** with fellow leaders online and in person.

Apply today, and once you're accepted we'll send you our "10 Soft Skills You Need" eBook as a sign-on gift. We hope to welcome you soon!

Learn more and start your application now.

Internet
Society

Dear Danish Khan,

The Internet Society Asia-Pacific (APAC) Bureau would like to invite you to participate in a Regional Webinar scheduled for December 17th from 13.00 to 14.00 hours (Singapore Time, UTC +8). This webinar has been specially designed for Internet Society Members; those interested to know more about our regional work and are keen to support our efforts in their local communities.

The APAC Bureau team will discuss some of its key activities in the region this year, and seek your views on what you see as major issues of concern on regional Internet related topics going into 2015.

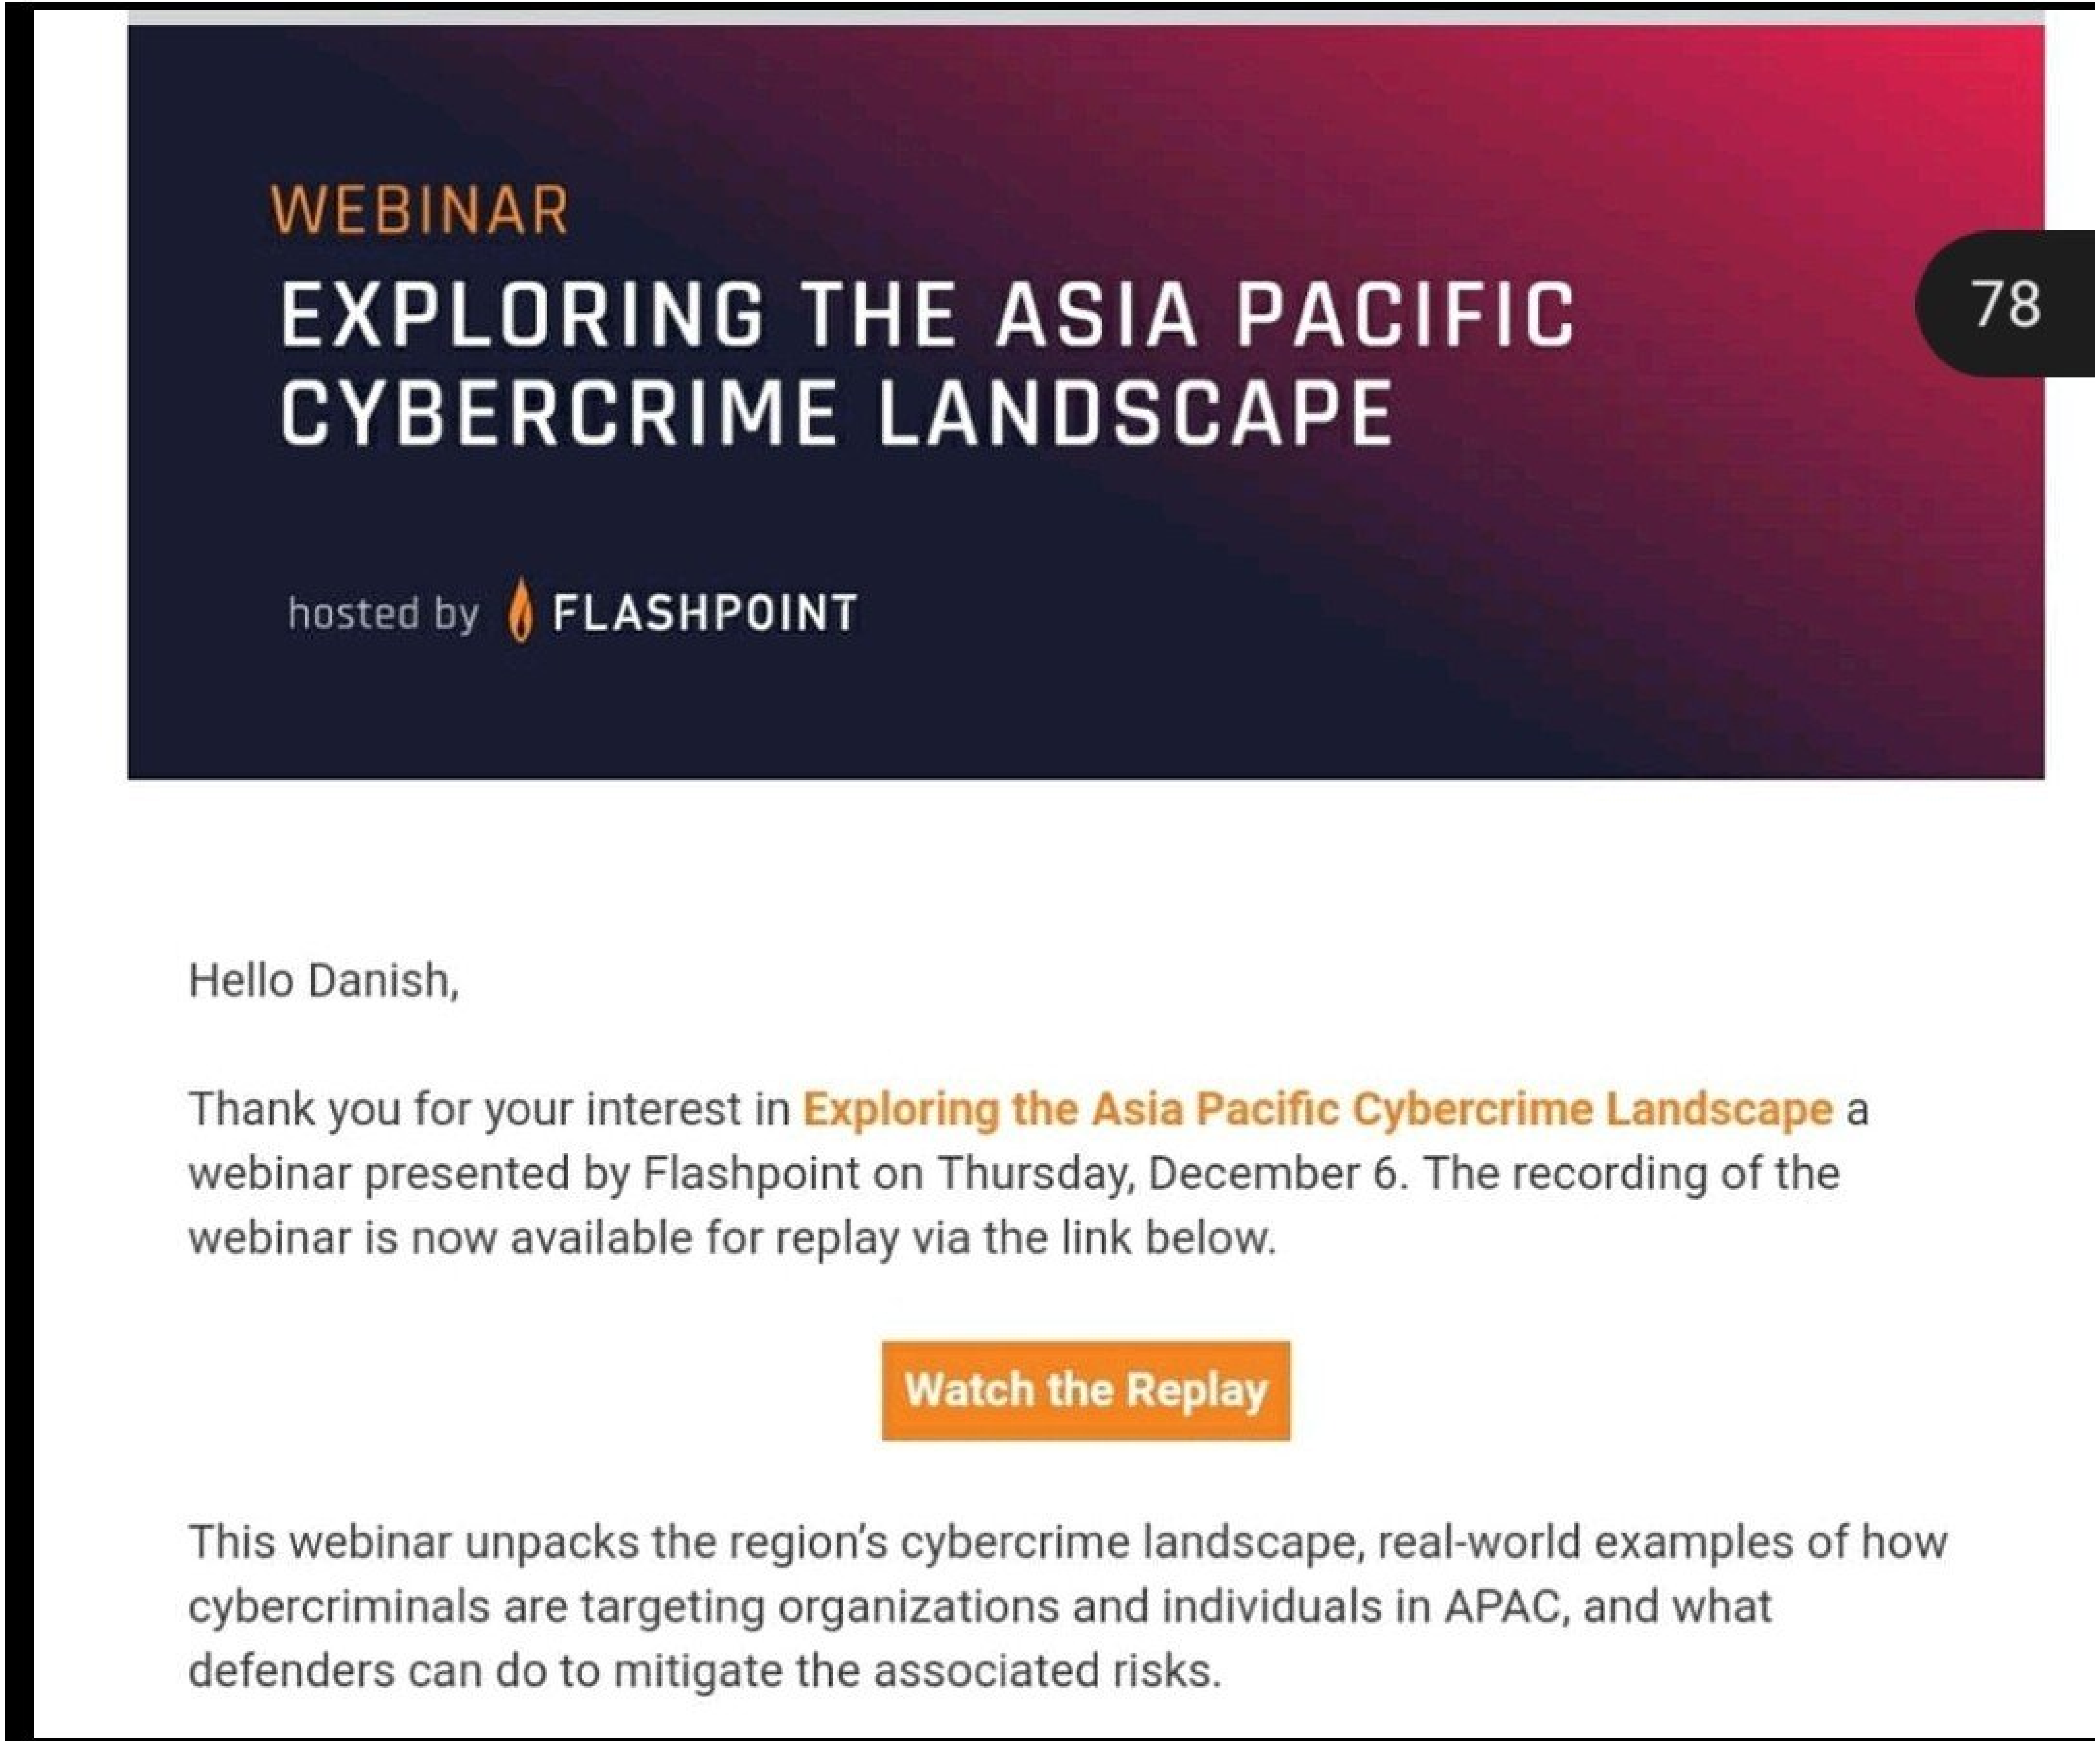
Agenda:

1300-1310: Brief introduction of the APAC Bureau Team

1310-1325: 2014 the year that was

1325-1350: Open discussion on regional Internet related issues going into 2015

1350-1355: Regional activities planned for 2015

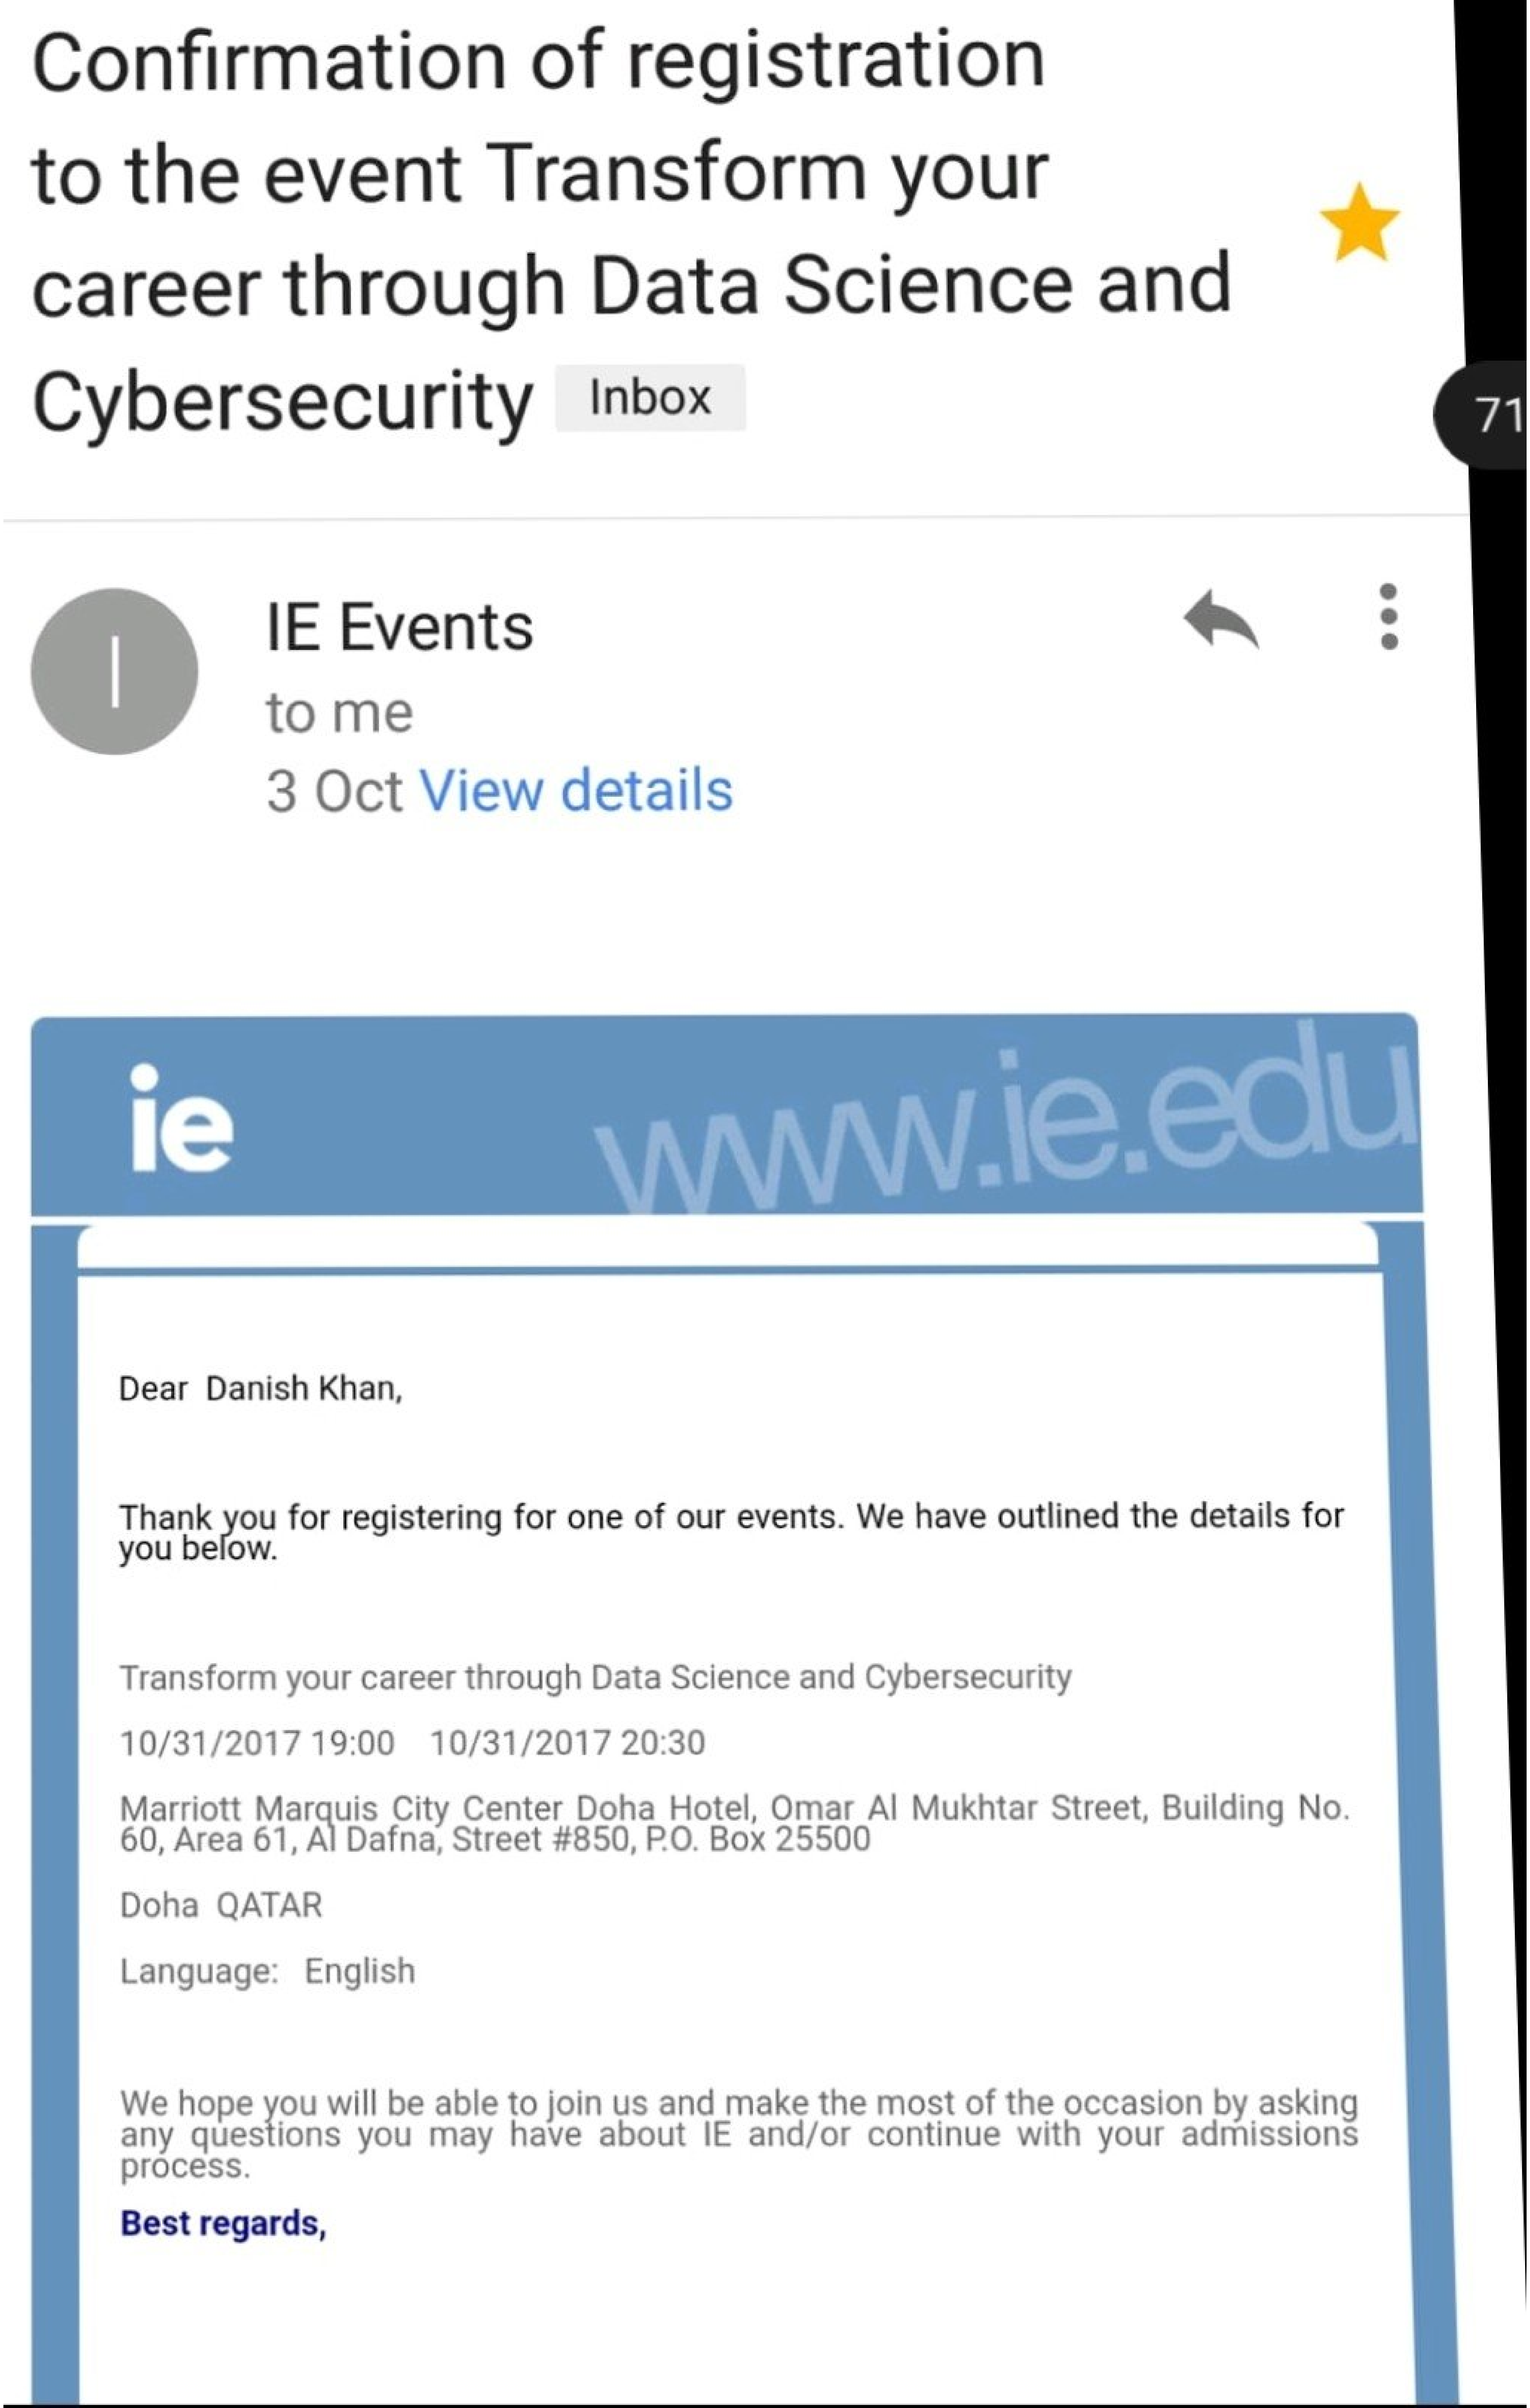


EXPLORING THE ASIA PACIFIC CYBERCRIME LANDSCAPE

Hello Danish,

Thank you for your interest in **Exploring the Asia Pacific Cybercrime Landscape** a webinar presented by Flashpoint on Thursday, December 6. The recording of the webinar is now available for replay via the link below.

This webinar unpacks the region's cybercrime landscape, real-world examples of how cybercriminals are targeting organizations and individuals in APAC, and what defenders can do to mitigate the associated risks.



Confirmation of registration to the event Transform your career through Data Science and Cybersecurity

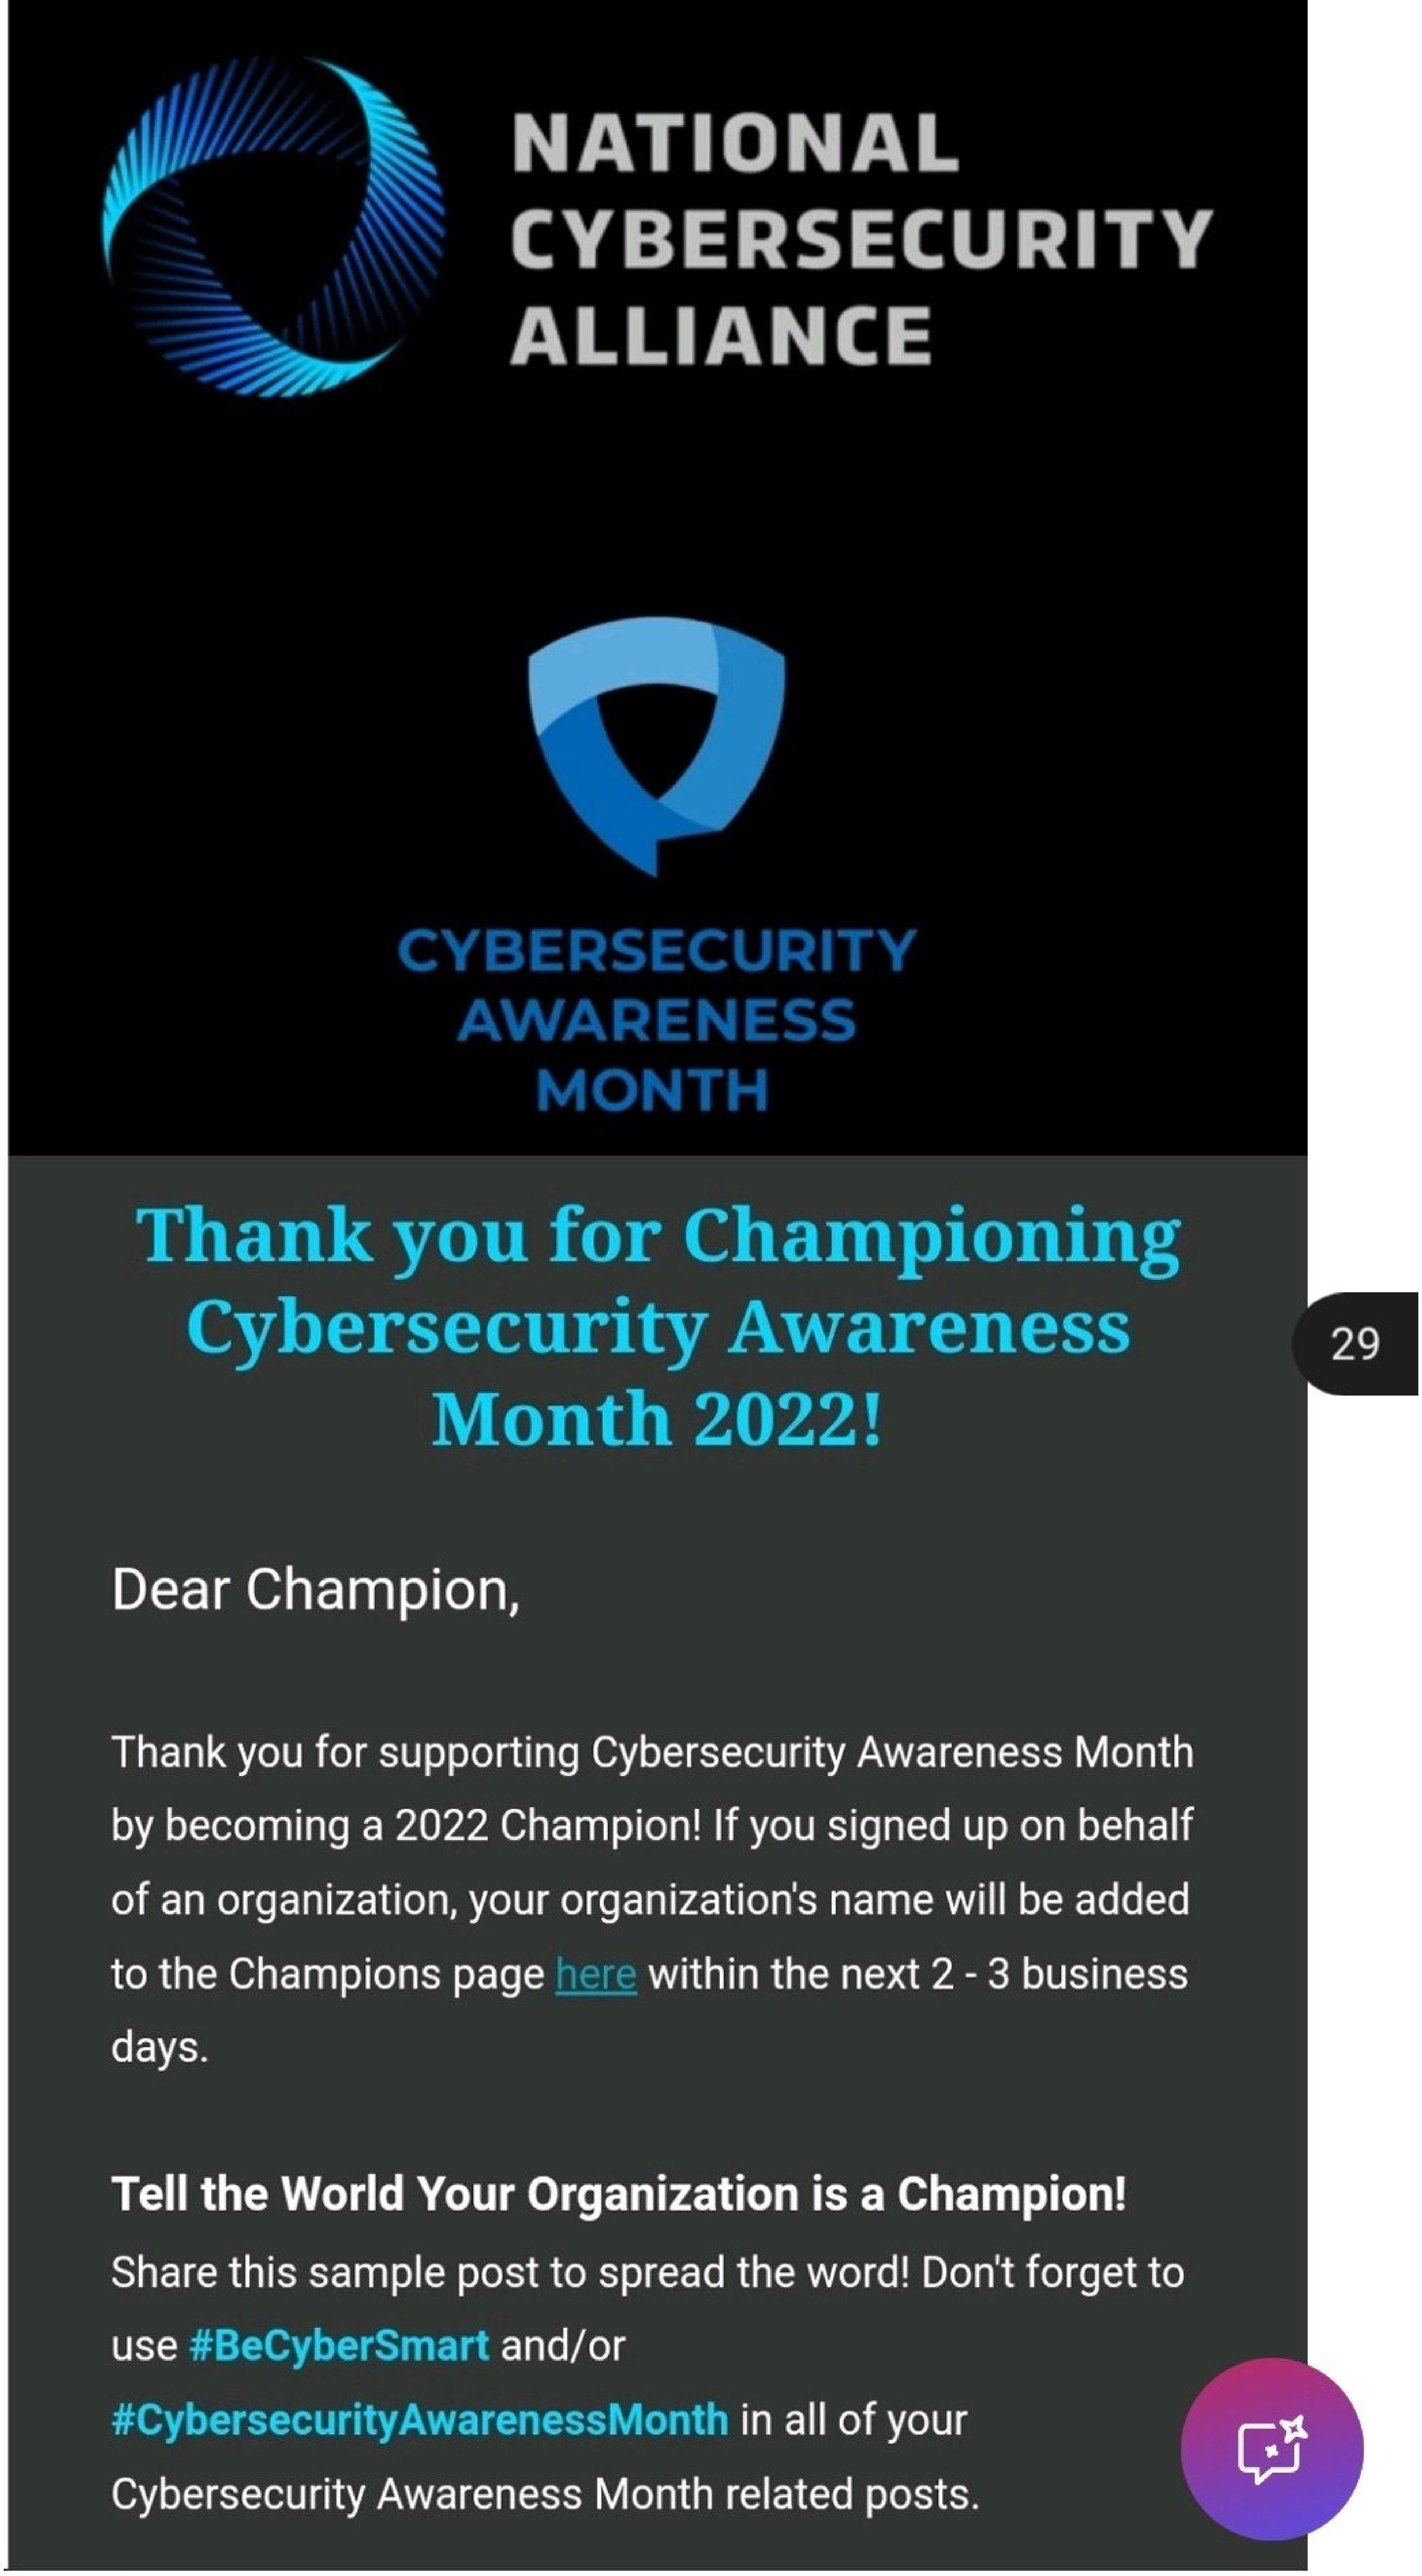
We hope you will be able to join us and make the most of the occasion by asking any questions you may have about IE and/or continue with your admissions process.

Best regards,



NATIONAL CYBERSECURITY ALLIANCE
CYBERSECURITY AWARENESS MONTH
29

Thank you for Championing Cybersecurity Awareness Month 2022!

Dear Champion,

Thank you for supporting Cybersecurity Awareness Month by becoming a 2022 Champion! If you signed up on behalf of an organization, your organization's name will be added to the Champions page here within the next 2 - 3 business days.

Tell the World Your Organization is a Champion!
Share this sample post to spread the word! Don't forget to use **#BeCyberSmart** and/or **#CybersecurityAwarenessMonth** in all of your Cybersecurity Awareness Month related posts.

3,622 Best Cybersecurity stories | War, Security, Ransomware - Flipboard

Avatar - Easytech4all · By Easytech4all. Follow Add favorite. Share Flip. 22,213 Viewers; 49,614 Page flips;

A **threat landscape** (also called a **threat** environment) is. a collection of **threats** in a particular domain or context, with information on identified vulnerable assets, **threats**, risks, **threat** actors and observed trends.”

5 biggest cybersecurity threats

- Social engineering. ...
- Ransomware. ...
- DDoS **attacks**. ...
- Third party software. ...
- Cloud computing vulnerabilities.

A **cyber** or **cybersecurity threat** is a malicious act that seeks to damage data, steal data, or disrupt digital life in general. **Cyber** attacks include **threats** like computer viruses, data breaches, and Denial of Service (DoS) attacks.

Differentiating cyber attacks generational wise was something which the security experts from CheckPoint introduced to the world. In their cyber threat dictionary, first generation cyber attacks were virus threats on floppy discs that would infect a single computer. The 2nd generation attacks were those which infected networked computers with viruses. 3rd generation attacks were browser-based cyber threats. 4th Generation of attacks was Polymorphic attacks where the virus has the ability to change its traits based on the system and the environment which it is trying to intercept. And as per the CheckPoint analysis, the 5Th generation attacks are those which take place so fast that preventive- that too proactive measures are required to counter them- rather than reactive measures.

“In today’s world, it’s a fact that our mobile phones contain more info than our desktops. But the manufacturers or the OS makers aren’t focusing much on security making them vulnerable to cyber attacks”, said Jarvis.

Highlighting attacks which topped the year 2018, Jarvis said that online attacks and Cryptocurrency mining attacks followed by Banking Trojans, phishing and other forms of malware were mostly analyzed by their company in last year. Also, Ransomware developers became lethal as they started to use cryptocurrency to keep their activities concealed from law enforcement agencies.
